## LETTER OF TRANSMITTAL

---

TREASURY DEPARTMENT,  
OFFICE OF COMMISSIONER OF INTERNAL REVENUE,  
Washington, D. C., November 12, 1957.

SIR: In accordance with the provisions of section 6108 of the Internal Revenue Code of 1954, requiring the preparation and publication of Statistics with respect to the operation of Federal income tax laws, I have the honor to submit this report, *Statistics of Income—1954, Fiduciary Income Tax Returns for 1954*. Data are presented for both taxable and nontaxable fiduciary returns and include the sources of income, deductions, income tax, and tax credits. These items are tabulated by significant categories such as taxable and nontaxable returns, size of income, State of filing, and type of return. More information, relating to the income of estates and of trusts, is shown than in any previous report.

Respectfully,

RUSSELL C. HARRINGTON,  
*Commissioner of Internal Revenue.*

HONORABLE ROBERT B. ANDERSON,  
*Secretary of the Treasury.*

# OTHER STATISTICS OF INCOME PUBLICATIONS

For 1954

## Corporations *Preliminary Statistics of Income—1954, Corporation Income Tax Returns*

Income statements, balance sheets, tax, dividends paid; classified by major industry groups. Historical summary of total compiled receipts, profit or loss, taxes, dividends paid, by net income status, 1950-54. (39 pp., 30¢)

## *Statistics of Income—1954, Corporation Income Tax Returns*

Income statements, balance sheets, taxes, dividends paid, tax credit. Classifications by industry groups, size of net income, size of total assets, accounting periods, accounting and inventory valuation methods. Special tables on beginning and ending inventories of manufacturing and trade corporations, cash dividends paid, corporations filing first returns, returns with foreign tax credits, Western Hemisphere trade corporations, personal holding companies. Historical summary, 1945-54.

## Individuals *Preliminary Statistics of Income—1954, Individual Income Tax Returns*

Adjusted gross income, taxable income, income tax liability, sources of income, exemptions, tax credits, itemized nonbusiness deductions; classified by size of adjusted gross income. Selected sources of income by States and Territories. (20 pp., 20¢)

## *Statistics of Income—1954, Individual Income Tax Returns*

Adjusted gross income, taxable income, income and self-employment tax liability, sources of income, exemptions, tax credits, itemized nonbusiness deductions; classified by size of adjusted gross income. Taxable income by taxable income size for applicable tax rates. Historical summary 1945-54.

## Estates *Statistics of Income—1954, Estate Tax Returns*

Gross estate, deductions, net estate, taxes, and tax credits. Classifications by size of gross estate, size of net estate before specific exemption. Selected estate tax data by States and Territories. (26 pp., 25¢)

For 1953

(Subjects not included for 1954)

## Sole proprietors *Statistics of Income for 1953, Part 1, Individual Income Tax Returns, Estate Tax Returns, Gift Tax Returns*

Sole proprietorship income, business receipts, net profit or loss. Classifications by size of total receipts, industry groups. (138 pp., 75¢)

## Partnerships *Statistics of Income—1953, Partnership Returns*

Partnership receipts, deductions, profit and loss, assets, liabilities. Classifications by industry groups, size of ordinary net income or deficit, size of total receipts. Frequency of returns by year of organization, new or successor business. Self-employment income and family partnership data. (62 pp., 45¢)

## Farmers' cooperatives *Statistics of Income—1953, Farmers' Cooperative Income Tax Returns*

Receipts, deductions, net income or deficit, tax, assets, liabilities, special deductions and adjustments. Classifications by size of business receipts, size of total assets, net income status, States and Territories, type of service performed, exemption status. (42 pp., 40¢)

## Gifts *Statistics of Income for 1953, Part 1, Individual Income Tax Returns, Estate Tax Returns, Gift Tax Returns*

Total gifts, exclusions, deductions, net gifts, tax. Classifications by size of net gifts, size of total gifts plus gift tax, tax status, type of property. (138 pp., 75¢)

Statistics of Income publications are for sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C.

## INTRODUCTION

This report, *Fiduciary Income Tax Returns for 1954*, is another in the series of publications issued for *Statistics of Income—1954*. The series consist of a separate volume for each type of return from which statistical information was compiled by the Statistics Division. These separate volumes replace the two former annual reports, *Statistics of Income, Part 1 and Part 2*. Only tabulations of information reported on fiduciary income tax returns, Form 1041, are contained in this report. Formerly, statistical data for fiduciary returns were included in *Statistics of Income, Part 1*.

Tabulations in this report include data from both taxable and nontaxable fiduciary returns. It is the second time in recent years that the nontaxable returns were used for statistical purposes. *Statistics of Income for 1952, Part 1*, also contained data from both taxable and nontaxable fiduciary returns. However, no data are available for fiduciary returns for the tax year 1953.

Following the text, which gives a resume of the provisions of the Internal Revenue Code for 1954 relating to fiduciary income and the explanation of the classifications of the returns and the items tabulated, there are eight basic tables for current-year data and two historical tables with significant data from taxable fiduciary returns covering a 10-year period.

A synopsis of recent revenue acts with respect to the requirement for filing and the income tax rates is placed at the end of the report with a facsimile of the fiduciary income tax return for 1954.

***Fiduciary  
Income Tax  
Returns***

## FIDUCIARY INCOME TAX RETURNS FOR 1954

The fiduciary income tax return, Form 1041, contains annual income either from a trust or from an estate in process of settlement, for which the fiduciary acts as an administrator. Since only certain small trusts and estates are excluded from the filing requirements, the 424,915 returns filed for the income year 1954 contained most of the income derived in the United States from these two sources. The total income was about \$3.9 billion, of which \$3.2 billion was on returns for trusts.

The income tax, payable by the fiduciary, was \$264 million for 1954. The graduated tax rates were the same as for the taxable income of a single individual. These rates were imposed on the amount of taxable income of the fiduciary, which aggregated \$697 million. The difference between the total income of \$3.9 billion and the much smaller taxable income of fiduciary, \$697 million, was caused by the subtraction of numerous allowable deductions. The largest single deduction of over \$2 billion was for the amount of distributions to beneficiaries, which is taxable on the income tax return filed by the beneficiary, rather than on the fiduciary return, Form 1041 (for summary of these data, see table B, page 8). As a result of the definition of the base upon which this tax is imposed, 70 percent of the fiduciary returns filed for income year 1954 were nontaxable.

### CHARACTERISTICS OF THE YEAR

For the income year 1954, there were 424,915 fiduciary income tax returns filed for the income of estates and of property held in trust. Of this total, 297,136 returns were nontaxable and 127,779 were taxable. Although there were over 11 thousand more returns than for 1952, the last year for which data are available there were 5 thousand fewer taxable returns.

Total income for all fiduciary returns amounted to \$3.9 billion. This was over a billion dollars more than was reported for 1952. The total deficit of \$11.8 million was more than one-third below the deficit of 1952. These differences were to some extent attributable to the gross basis of reporting certain sources for 1954, as compared with a net basis of reporting all income items for 1952. The average total income per return was \$9,243 for 1954, but 67 percent of the returns showed total income under \$5,000. There were 3,778 returns with total income of \$100,000 or more, 1,624 of which were nontaxable returns.

Taxable income of fiduciary for the tax year 1954 was \$697 million. This income was retained by the fiduciaries and they were liable for the income tax on this amount. The income tax before credits on

the 127,779 taxable returns was \$269 million. Tax credits claimed by the fiduciaries were \$4.2 million for dividends received, \$726 thousand for foreign tax paid, \$75 thousand for partially tax-exempt interest, and \$27 thousand for tax paid at source on tax-free covenant bonds.

Income tax liability after credits was \$263.9 million, an increase of 12 percent over the tax liability for 1952, even though there were fewer taxable returns for 1954 and the income tax rates were lower than for 1952 income. The effective tax rate for 1954 taxable returns was 37.9 percent based on taxable income of fiduciary.

Text table A presents a comparison of the number of returns, total income, deficit, and income tax reported on the 1954 and 1952 fiduciary returns. The number of returns for 1952 in this comparison has been adjusted to eliminate returns that had no information regarding income or tax, so that the number of returns is comparable. Such returns were included in the 1952 published report.

Table A.—NUMBER OF RETURNS, INCOME, DEFICIT, AND TAX: 1954 AND 1952

Items	1954	1952	Increase or decrease	
			Number or amount	Percent
All returns:				
Number of returns <sup>1</sup> .....	424,915	413,679	+11,236	+2.72

Deficit in total income thousand dollars..	11,765	18,407	-6,642	-36.08

<sup>1</sup>Excludes returns with no information reported.

The normal tax and surtax for 1954 fiduciary returns amounted to \$131 million and the alternative tax was \$132.9 million on 2,917 returns with taxable income of fiduciary of \$18,000 or more. The normal tax and surtax was about 10 percent less than that of 1952, but the alternative tax had increased nearly 50 percent over the alternative tax for 1952.

Of the sources of income, dividends of \$1.8 billion formed the largest single item and comprised nearly one-half of the total income. Dividend receipts occurred on 72 of every 100 returns.

Net proceeds reported in total income from sales of capital assets, amounting to \$826.2 million, were the second largest element, followed by gross rents and royalties of \$589.2 million.

Total deductions claimed on the 1954 fiduciary returns were \$3.3 billion of which the deduction for distributions to beneficiaries was the largest. This distribution of \$2.1 billion was taxable to the beneficiary recipients. The deduction appeared on 73 of every 100 returns.

Eight and one-half percent of the returns had interest paid and nearly 44 percent of the returns had taxes deducted. Charitable contributions of \$72 million were deducted on 9,659 returns.

Each of the new deductions, dividend exclusions and long-term capital gain, occurred on one-fourth of the returns, while depreciation was claimed on one-eighth of the returns.

#### COMPOSITION OF TOTAL INCOME, 1954

In chart 1, the components comprising total income reported on fiduciary returns are shown in a percentage relationship to the total income of \$3.9 billion. Dividends, as usual, were the largest source of fiduciary income, constituting 47 percent of the income as a whole. Gain from sales of assets, forming 21 percent of the total, was the net amount realized from both capital assets and other property. Rents and royalties, for the most part, were gross receipts and formed 15 percent of the total. Gross profit and loss from business was combined with partnership income and loss to form 6 percent of the total income reported. Other income included the net amount received from other fiduciaries and the miscellaneous items reported as other income.

Segments in the composition of total income have changed since 1952. Much of the change results from the new method of reporting fiduciary income under the 1954 Code. Dividend receipts made up a smaller portion of the total income than was the case on the 1952 returns, although the dollar receipts were larger. Gain from sales of assets more than doubled the proportion of the total as compared with that for 1952, but the comparison is not entirely mean-

ingful because the capital gain deduction was not applied in 1954. The percentage for rents and royalties showed an increase over 1952, probably on account of the gross receipts basis of reporting in 1954. Interest formed a smaller portion of the total income than in 1952, though the amount was greater. The business and partnership percentage was somewhat larger than two years ago. However, business income for 1954 was reported on a gross profit basis.

#### FIDUCIARY INCOME TAX PROVISIONS UNDER THE 1954 CODE

The Internal Revenue Code for 1954 effected substantial changes in the law governing the taxation of income of estates and trusts and the distributions to beneficiaries, as well as changes in terminology and language relating to the subject of fiduciary income taxation, which had been in use over a long period of years. These new provisions apply to estates and trusts with a tax year beginning after December 31, 1953 and ending after August 16, 1954.

The new Code separates trusts into two basic types generally referred to as simple trusts and complex trusts, and establishes rules for each. Simple trusts include trusts which are required to distribute all income currently and have no provisions in the trust instrument for paying out amounts for charitable purposes. Complex trusts are trusts which may accumulate income and distribute corpus, or which may make charitable contributions. Rules provided for complex trusts apply also to estates under administration.

Income tax is imposed on the taxable income of a fiduciary at the same rates which apply to the taxable income of single individuals who are not heads of household or surviving spouse, as was the case under previous law. The rates effective on January 1, 1954 are 20 percent of the first \$2,000 of taxable income of fiduciary, increasing at graduated rates to 91 percent of taxable income in excess of \$200,000. These rates are lower than the rates on 1952 and 1953 income.

New tax credits were introduced under the 1954 Code. A tax credit for domestic dividends received is allowed to an estate or trust if the tax year ended after July 31, 1954, with respect to dividend received after that date and retained by the fiduciary. The credit is 4 percent of such dividend retained but cannot exceed (a) income tax reduced by foreign tax credit, or (b) 2 percent of the taxable income.

The tax credit for partially tax-exempt interest replaces the former deduction from net income of such interest for normal tax purposes. The credit relates to the share of partially tax-exempt interest retained by the fiduciary, but cannot exceed the smallest of (a) 3 percent of the partially tax-exempt interest retained less the portion of amortized bond premium deduction pertaining thereto, (b) the amount of income tax reduced by the tax credits for dividends received and for foreign taxes paid, or (c) 3 percent of the taxable income of the fiduciary.

The 1954 Code substitutes "taxable income of fiduciary" for "net income of fiduciary." The former means total income less allowable deductions. Allowable deductions differ from previous deductions and also include the exemption for the first time.

There are numerous changes in the content of the items comprising total income and, therefore, in total income itself. The most outstanding changes occur in (a) rent and royalty income which is now on a *gross* basis, (b) business profit or loss which is now on a *gross* basis, i.e., gross receipts less cost of goods sold, and which now excludes all types of *other* income received by the sole proprietorship which are to be reported on Form 1041 according to the character of the income (for example, interest received by a sole proprietorship engaged in retail trade is reported as interest), and (c) net gain from sales of capital assets, the amount of which is *not* reduced by 50 percent of the excess of net long-term capital gain over net short-term capital loss.

As a result of including gross rents and royalties and gross profit or loss from business in total income, the deductions for interest, taxes, depreciation, contributions, and other authorized deductions include the expenses for rent, royalty, and business activities. The fiduciary's share of depreciation is a separate deduction as are also his share of the dividend exclusion and his portion of the excess long-term capital gain deduction. The charitable deduction is independent of distributions to beneficiaries. The deduction for distributions to beneficiaries is limited to the amount of distributable net income (a new concept). Distributions to beneficiaries become taxable to them and retain the same character as in the hands of the fiduciary.

Exemption, which was formerly a credit against net income, is now allowed as a deduction in computing taxable income of fiduciary. The exemption is increased from \$100 to \$300 for trusts required by their trust instrument to distribute all of their income currently, none of which is paid out for charitable purposes. All other trusts are allowed \$100 exemption and estates are allowed \$600, as in former years.

#### RETURNS FROM WHICH DATA WERE TABULATED

Fiduciary income tax returns, Form 1041, used for the compilation of data in this report included both taxable and nontaxable returns, neither of which had been audited by the Internal Revenue Service. For this reason, these statistics do not reflect any changes in income, deductions, exemptions, taxes, or other items which may have resulted from the official audit.

Data were taken from fiduciary returns for the income year 1954 which included calendar years, fiscal years ended within the period July 1954 through June 1955, and part years with the greater number of months in 1954. Tentative returns were not used and amended returns were used only if the original returns were excluded. For the first time, fiduciary returns with no information concerning income, deductions, and tax were not used for statistics.

The Internal Revenue Code of 1954 applies to the income of estates and trusts with a tax year which began after December 31, 1953 and ended after August 16, 1954. Consequently, fiduciary returns with tax year beginning in 1953 and part-year returns with accounting period ended before August 17, 1954 were subject to the Internal Revenue Code of 1939. Returns of estates and trusts subject to the 1939 Code generally were filed on Form 1041 for 1953, as instructed. On the 1953 form, items of income were reported on a net basis and deductions were reported according to the law for that year. Approximately 8 percent of the total returns filed were subject to the 1939 Code. The 1954 fiduciary return, Form 1041, was revised to fulfill the needs of the new provisions of the 1954 Code. Consequently, items of income are on a gross basis and deductions carry all expenses for rents, royalties, and business, in addition to several new deductions.

#### TAXABLE AND NONTAXABLE FIDUCIARY RETURNS

Tabulations for fiduciary income tax returns in this report include data from both taxable and nontaxable returns. The nontaxable returns form a very important part of the fiduciary income as a whole. About 70 percent of the 1954 fiduciary returns were nontaxable. A fiduciary return is taxable only when income in excess of the allowable exemption is retained by the fiduciary. Returns are often rendered nontaxable because of the distributions to beneficiaries.

Text table B has been prepared so that the taxable and nontaxable data may be readily associated. Total income on the nontaxable returns was a little larger than the total income on the taxable returns. There are just two sources of income on taxable returns that outranked those on nontaxable returns: net profit from partnership and net gain from sales of capital assets. Gains from capital assets are generally considered corpus and for the most part are not distributed to beneficiaries, but instead remain in the hands of the fiduciary. Therefore, it is understandable that a larger amount of these gains occurred on the taxable returns. However, allowable expenses, exemption, and other deductions can be deducted from them for income tax purposes.

Total deductions on the nontaxable returns were nearly twice those on the taxable returns. However, two deductions on taxable returns exceeded those on the nontaxable returns: dividend exclusions and long-term capital gain deduction. The latter is to be expected since it relates to the capital gain in total income of the taxable returns. The distributions to beneficiaries on nontaxable returns are almost three times those on the taxable returns. On nontaxable returns, 77 percent of the total income was distributed to beneficiaries, but only 31 percent of total income on the taxable returns was distributed. Without this deduction for distributions, the remaining deductions were about equal.

Practically all of the nontaxable returns resulted in a deficit amount of taxable income. The taxable returns showed that \$697 million of income was retained by the fiduciaries, and this was the base for the income tax liability.

<sup>1</sup> Sample variability of this item is too large to warrant showing it separately. However, this value is included in the total.

## RETURNS OF TRUSTS AND OF ESTATES

Fiduciary income tax returns are of two types, those which show income of estates and others which show income of trusts. Returns of estates are filed annually, by the administrator or executor of the estate of a deceased person, during the period of time in which the estate is being administered under the testator's will or, if intestate, under the jurisdiction of the local court. Generally, returns for the income of an estate are required only for a short period of years. When the estate is settled and assets distributed, the income ceases and no more returns are required.

On the other hand, income of trusts is of a more permanent nature. A trust is created for a specific purpose by means of a trust instrument or agreement for a term of years or may extend for an indefinite time. The income of the trust is reported annually by the trustee as long as the trust exists.

Seventy-six percent of all fiduciary returns for the income year 1954 were returns for trust income, and 24 percent were returns for the income of estates. However, of the total number of taxable fiduciary returns, 70 percent were for trusts and 30 percent for estates.

On account of the different functions of a trust and an estate, each has its distinctive characteristics. Different proportions of the total income are distributed, leaving different proportions in the hands

of the fiduciary for taxation. Certain items of income vary in relation to their respective total income, although similar items of income are reported for each.

Text table C has been compiled to point out these and other characteristics. The six sources of income in the table correspond to those shown in the composition of total income for all fiduciary returns in chart 1, page 6. As in that chart, the money amount for each source of income in table C is the net proceeds from that source. Business and partnership were combined and gain from sales of assets includes both capital assets and other property.

Of the 321.2 thousand trust returns, 28 percent were taxable returns showing \$509.6 million taxable income retained by the fiduciary. This was one-sixth of the total income of the trusts. Income tax after credits, paid at time of filing by the trustees of these trusts, was \$198.1 million.

Of the 103.7 thousand returns for estates, 37 percent were taxable returns with \$187.4 million taxable income retained by the fiduciary. This was more than one-fourth of the total income of the estates. Income tax liability reported by executors of these estates was \$65.8 million.

Total income reported on returns for trusts was \$3.2 billion while that on returns for estates was \$690.9 million. Data from returns for trusts showed 51 percent of the total income to be from dividends, 22 percent as gain from sale of assets, and 13 percent from rents and royalties, with only 4 percent from business and partnership. By comparison, the returns for estates had 30 percent from dividends, 19 percent from gain on sale of assets, 24 percent from rents and royalties, and 15 percent from business and partnership. Interest income is the only source occurring in the same proportion.

Only two deductions are available for comparison between the trusts and estates. The deduction for distributions to beneficiaries of \$1.9 billion on returns for trusts indicates that 60 percent of their total income was distributed according to the trust instruments. The returns for income of estates showed that this distribution, amounting to \$212.8 million, was 31 percent of the total income of the estates.

Table C.—SOURCES OF INCOME, TAXABLE INCOME, AND TAX FOR TRUSTS AND FOR ESTATES

Items	Total fiduciary returns	Returns for trusts		Returns for estates	
		Number or amount	Percent of total	Number or amount	Percent of total
Number of returns:					
Taxable.....	127,779	89,470	28	38,309	37
Nontaxable.....	297,136	231,726	72	65,410	63
Total.....	424,915	321,196	100	103,719	100
	(Thousand dollars)	(Thousand dollars)		(Thousand dollars)	
Sources:					
Dividends (before exclusions).....	1,811,158	1,603,382	51	207,776	30
Interest received.....	331,053	271,565	9	59,488	9
Rents and royalties.....	589,164	421,747	13	167,417	24
Business and partnership.....	233,684	133,469	4	100,215	15
Gain from sale of assets.....	824,694	690,876	22	133,818	19
Other income.....	72,174	50,012	1	22,166	3
Total income.....	3,861,924	3,171,051	100	690,873	100
Distributions to beneficiaries.....	2,123,574	1,910,777	60	212,796	31
Exemptions.....	140,203	77,965	2	62,237	9
Taxable income of fiduciary.....	697,011	509,609	16	187,402	27
Income tax after credits.....	263,893	198,132	-	65,761	-

Exemption of \$600 was claimed against the total income on each of the 103.7 thousand returns for estate income. Returns for trusts showed that an exemption of \$300 was claimed for each of the 229.2 thousand simple trusts, and \$100 was claimed for each of 92 thousand complex trusts. This frequency for simple and complex trusts was based entirely on the amount of exemption taken and not on a legal definition. These exemptions provided tax-free income of 9 percent in the case of income of estates, but only 2 percent for the income of trusts.

#### TABULATED DATA

Fiduciary income and tax data for the income year 1954 are tabulated in eight basic tables. With the exception of two tables, these data are distributed by total income classes. There is one table showing a distribution by size of the taxable income of fiduciary, and one with information tabulated by States and Territories. Data from taxable and nontaxable returns are shown separately in six tables but are combined in the remaining two. Summary information for returns under \$5,000 and for returns \$5,000 or more total income, occurring in several of the tables, is cumulated from the classes as such, regardless of the tax status.

All of these basic tables include data for estates and trusts subject to the 1939 Code as well as data from those subject to the 1954 Code. As a consequence, the various sources of income tabulated are a combination of data part of which was reported on a net basis and part on a gross basis. Similarly, of the several deductions, each is an aggregate of a deduction sometimes reported as required under the new law and other times as required under the old law. Tax items also vary according to the provisions governing the accounting period of the estate or trust. Ninety-two percent of the fiduciary returns were subject to the 1954 Code.

In table 1, the number of fiduciary returns with total income and the related amounts of total income, taxable income of fiduciary, and income tax after credits are tabulated to show their distribution by total income classes, as well as their cumulation at each income class level from the lowest class and their cumulation at each income class level from the highest class, together with a corresponding percentage of the total. Taxable and nontaxable returns with total income are combined, but nontaxable returns with no total income are shown apart from the cumulations. Throughout these distributions, the nontaxable returns with total income are in their proper class.

Table 2 presents statistics for all fiduciary returns tabulated by total income classes, separately for taxable and nontaxable returns. These data show the sources of income and loss comprising total income, total income, and allowable deductions which include among others the dividend exclusions, charitable deduction, distributions to beneficiaries, long-term capital gain deduction, and exemptions. Also, there are shown the taxable income of fiduciary, income tax before credits, tax credits, and income tax liability after credits. Frequencies for number of

returns are supplied for each item where appropriate and also for the number of returns with no taxable income of fiduciary.

Table 3 contains data from the fiduciary returns filed for the income of trusts. It shows each of the sources comprising total income, total income, the deduction allowed for distributions to beneficiaries, exemption claimed at \$300 by each simple trust and that claimed at \$100 by each complex trust, taxable income of the trust, and income tax liability after credits. The number of returns is given for these items and also for the number of trusts with no taxable income of trust. Taxable and nontaxable returns are shown separately by total income classes.

Table 4 contains only data from fiduciary returns filed for the income of estates. This is a companion table for table 3 with the same classification and with similar items, except that the exemption is \$600 for each estate.

Table 5 shows a distribution of data for fiduciary returns that had taxable income of fiduciary. These data are classified by size of taxable income of fiduciary. This is a new classification in which the class intervals correspond to the brackets of the graduated tax rate schedule applicable to fiduciary income. The amounts of taxable income, normal tax and surtax, and alternative tax (both after credits) are tabulated and the frequencies for the taxes are also shown. Nontaxable returns with taxable income are those on which the original income tax was eliminated by the tax credits.

Table 6 for taxable fiduciary returns contains data related to the normal tax and surtax and that related to the alternative tax, and shows for each, by total income classes, the total income, taxable income of fiduciary, income tax after credits, average income tax, and the effective tax rate based on taxable income.

Table 7 pertains to the capital gains and losses reported on fiduciary returns. Data for returns with a net loss from sales of capital assets in total income are tabulated apart from data for returns with a net gain from such sales in total income. Returns with net gain from sales of capital assets are segregated to show data relative to normal tax and surtax separately from the data relating to alternative tax. In all categories, the net short-term capital gain and loss, the net long-term capital gain and loss, and the capital loss carryover are tabulated by total income classes. In addition, there is the capital loss before application of the statutory limitation on the deduction, as well as the allowable loss deducted from gross income in computing total income, and the amount of capital gain included in total income.

Table 8 for fiduciary returns shows two sources of income, total income, taxable income of fiduciary, and income tax liability after credits, with frequencies for these items and also for returns with no taxable income, distributed by States and Territories in which the returns were filed. Returns with no total income are not included in this table.

In addition to the basic tables for 1954 fiduciary income and tax data, there are two tables, numbers 9 and 10, which show historical data reported on taxable returns for income years 1945 through 1954, except

that no data are available for 1953 income year. Table 9 distributes by total income classes the number of returns, amounts of total income and income tax after credits. Table 10 presents the sources of income comprising total income, total income, deductions, and taxable income of fiduciary.

Throughout the tables, money amounts in thousand dollars and percentages were rounded and may not add to the totals.

#### DESCRIPTION OF THE SAMPLE AND LIMITATIONS OF DATA

The data presented for fiduciary income tax returns for 1954 are based on a stratified systematic sample which called for including 100 percent of returns showing total income of \$50,000 or more and of various lesser percentages of returns showing total income under \$50,000. More than 34,000 returns were selected in 64 district directors' offices. These represented about 8 percent of the total population of 431,337 fiduciary returns filed throughout the country.

**Description of the sample.**—Table D shows the number of returns processed, the number of returns in the sample, the prescribed sampling ratios, and the achieved sampling ratios, by estimating stratum. The differences between the prescribed sampling ratios and the achieved sampling ratios arise from three sources: incomplete numbering series, non-response, and the normal variation between expected sample size and actual sample size that arises in systematic sampling through the use of serial numbers.

Table D.—NUMBER OF FIDUCIARY INCOME TAX RETURNS PROCESSED FOR 1954, NUMBER OF RETURNS IN SAMPLE AND SAMPLING RATIOS, BY ESTIMATING STRATUM

Sampling stratum		Number of returns processed	Number of returns in sample	Sampling ratios or skip interval	
Total income	Tax status			Prescribed	Achieved
Under \$50,000.....	Taxable.....	121,086	10,766	1/9	1/11
Under \$50,000.....	Nontaxable....	298,940	14,957	1/19	1/20
\$50,000 and over....	Taxable.....	6,236	5,382	1/1	7/8
\$50,000 and over....	Nontaxable....	5,075	3,627	1/1	2/3
Grand total, all returns.....		431,337	34,732	-	-

In addition to the stratification imposed by selecting returns from each internal revenue district, the sample selection was adapted to the regular return sorting procedures which are employed in the district offices to facilitate collection and audit requirements. Returns are sorted on the basis of size of total income and taxpayer status, as reported by the taxpayer. These sorts constituted effective sampling strata because the characteristics on which the strata are based correlate highly with income and tax characteristics.

**Inflating sample values to population size.**—The sample values were extended to the returns they represented by multiplying them by "weighting factors." These weighting factors were derived for each class of return by dividing the number of sample returns into the total number of returns filed. For instance,

the weighting factor of 20 for low, nontaxable returns was obtained by dividing the number of returns in the sample, 14,957, into the total number of returns filed, 298,940. The primary sources of population data were counts made and submitted by the district offices showing the numbers of Form 1041 returns processed.

In comparing the weighted sample numbers of returns with the figures presented as national totals for similar classes of returns, slight discrepancies will be noted. As shown in table E, the discrepancies result from the elimination of certain returns and the reclassification of others in preparing the tables.

Table E.—SOURCES OF DEVIATION BETWEEN WEIGHTED SAMPLE NUMBER OF RETURNS AND NUMBER OF RETURNS APPEARING IN TABLES FOR 1954

Total income class	Number of returns		Deviation from weighted sample	Source of deviation	
	National totals	Weighted sample		Returns with no information <sup>1</sup>	Misclassified returns
Under \$50,000, taxable.....	122,299	121,086	+1,213	0	+1,213
Under \$50,000, nontaxable.....	292,795	298,940	-6,145	-6,422	+277
\$50,000 and over, taxable.....	5,480	6,236	-756	0	-756
\$50,000 and over, nontaxable.....	4,341	5,075	-734	0	-734
All classes.....	424,915	431,337	-6,422	-6,422	0

<sup>1</sup>These figures are estimated from sample returns filed with the Internal Revenue Service but which contain no information on income. They are in the population of returns sampled but are excluded from tabulations.

Separate systems of weighting were used for the national tabulations and for the State tabulations. The weights for the national tabulations were derived from nationwide populations obtained by adding the populations reported by the district directors' offices. The separate district office populations were used to derive the independent district office weights for the State tabulations. Achieved sampling rates varied sufficiently among districts to warrant using two separate systems of weights.

As a result of using two weighting systems and rounded weighting factors, there exist slight discrepancies between items in tables showing distributions by States and corresponding items shown in the national tables.

**Sampling variability.**—The data are subject to sampling variability. Table F below shows the range within which we would expect to find 19 out of 20 estimates prepared from samples similarly selected. In the preparation of this table, it was assumed that systematic selection within strata would yield results equivalent to simple random sampling. For instance, if data from taxable returns showing total income under \$50,000 reveal 10,000 returns having a certain characteristic, the chances are 19 out of 20 that the difference between this figure and the one that would have been obtained from a complete count is less than 620.

A general table of sampling variability for estimates that are based on returns from the several strata is not practical to prepare because of the large number of entries in the tables. The sampling variability for the value in each such cell must be estimated individually.

**Deletion of certain entries.**—Throughout the tables the policy has been followed of deleting where pos-

Table F.—SAMPLING VARIABILITY OF ESTIMATED NUMBER OF RETURNS

If the estimated number of returns is—	And the total income class of returns to which the estimate refers is—	
	Under \$50,000, taxable	Under \$50,000, nontaxable
	Then the chances are about 19 out of 20 that the difference between this estimated number of returns and the figure that would be obtained from a count of all returns is less than—	
100.....	60	80
1,000.....	200	270
10,000.....	620	860
25,000.....	910	1,320
50,000.....	1,100	1,780
75,000.....	1,090	2,070

sible those entries where the estimated relative error traceable to sampling variability was judged to be excessive. These cells are appropriately noted in each instance where this deletion has occurred.

Other limitations of the data.—In addition to sampling variability, the data are subject to certain other limitations. Many of the tax returns from which data were obtained had not been subjected to a complete audit with the result that errors made by taxpayers in filling out the returns were not completely eliminated. In addition, controls maintained over the selection and processing of the returns used in compiling the data do not completely eliminate the possibility of error. Practical operating considerations necessitate allowance of reasonable tolerances in processing controls.

## EXPLANATION OF CLASSIFICATIONS AND TERMS

### Classifications for Fiduciary Returns

Fiduciary returns for estates and trusts for the income year 1954 were classified by size of total income, by size of taxable income, by States and Territories, as taxable and nontaxable returns, and as returns for estates or trusts. Taxable returns were classified by types of tax.

These classifications were applied to all returns whether subject to the 1939 Code or to the 1954 Code. Classifications as described below refer in particular to circumstances under the 1954 Code. For returns subject to the 1939 Code, there was a corresponding counterpart on which the classification was based, except that surtax net income was substituted for taxable income of fiduciary. Only 8 percent of the total returns filed were subject to the 1939 Code.

Total income classes.—Fiduciary returns were classified into total income classes based on the amount of total income reported for each estate or trust. Returns that showed a deficit in total income, regardless of the amount, and returns with a break-even in total income are designated "No total income" and appear in aggregate under nontaxable returns. Returns with no information concerning income and deductions were excluded.

Taxable and nontaxable returns.—This classification was based on the presence or absence of an income tax liability after credits. Taxable returns are those which had an income tax liability remain-

ing after the four tax credits allowed for foreign taxes paid, tax paid at source on tax-free covenant bonds, dividends received, and partially tax-exempt interest had been deducted. Nontaxable returns are returns with no income tax remaining after the four tax credits. A few nontaxable returns had a tax before credits which was eliminated by the credits.

Returns for estates and for trusts.—Certain fiduciary returns were filed for the income of an estate under administration and others for the income from property held in trust. This classification was determined from these facts.

Types of tax.—Taxable returns were classified by the two types of tax, namely, normal tax and surtax, and alternative tax. The alternative tax concerns the special treatment of taxing capital gains.

Taxable income classes.—This size classification was based on the amount of taxable income of fiduciary. Taxable income of fiduciary is a new term under the 1954 Code and is the amount to which the tax rates are applied. The class intervals coincide with the brackets of the graduated tax rate schedule. For returns subject to the 1939 Code, surtax net income (a comparable concept) was used as the basis of this size classification.

States and Territories.—The distribution of fiduciary returns by States and Territories included the 48 States, District of Columbia, and Hawaii. This distribution was based on the location of the internal revenue district in which the return was filed, except that the District of Columbia was separated from the Baltimore (Md.) District, by means of the address of the fiduciary.

### Sources of Income Comprising Total Income

As previously stated, the sources of income on fiduciary returns for the income year 1954 were reported under rules pertaining to the 1954 Code in some instances and to the 1939 Code in others. The descriptions below relate to amounts reported under the 1954 rules. Ninety-two percent of all returns were subject to the 1954 Code.

Dividends (before exclusions) include foreign and domestic dividends received by the estate or trust through trade or business, partnership, or another fiduciary, as well as those received directly. However, so-called dividends from mutual savings banks, cooperative banks, domestic building and loan associations, domestic savings and loan associations, and Federal savings and loan associations are to be reported as interest according to instructions on the return and, therefore, are excluded from dividends received.

Interest received is that on bank deposits, notes, corporation bonds, mortgages, tax-free covenant bonds, and Government obligations (unless wholly exempt), and includes such interest received through partnerships, trade or business, and other fiduciaries. Interest also includes the so-called dividends listed above which, according to the instructions, are considered interest for income tax purposes.

Partnership net profit or net loss is the estate's or trust's share (whether received or not) of the ordinary net income or loss from all partnerships, syndicates, or joint ventures in which the estate or trust participated. If there were two or more

partnerships, the shares of profit and loss were combined and only the net result reported. However, the share of partnership profit or loss reported excluded gain or loss from sales of capital assets, dividends received, and partially tax-exempt interest, but the share was reported without the deduction for contributions or the net operating loss deduction.

Fiduciary income or loss is the estate's or trust's share, as beneficiary, of the distributions to beneficiaries (whether received or not) from another estate or trust. However, in reporting this income the fiduciary excluded gains from sales of capital assets, dividends received, and partially tax-exempt interest so as to report each in its respective source. A loss, including capital loss, from another estate or trust can be received only upon termination of the other estate or trust.

Gross rents and royalties received or accrued were reported as a single item of income and the combined amount reported is the gross rentals, received directly or through business, for the occupancy of real estate or the use of personal property, as well as gross royalties from books, plays, copyrights, trade-marks, formulas, patents, and from natural resources such as oil, gas, timber, and mineral rights. All expenses relating to such income were claimed among the deductions for interest, taxes, depreciation and depletion, and other deductions.

Gross profit or loss from trade or business is the excess of gross receipts from sales or services over cost of goods sold, and gross loss is the reverse. Any other type of business income was reported in the appropriate source according to the character of such income. Business expenses were deducted by the fiduciary under depreciation, charitable contributions, and other deductions.

Net gain from sales of capital assets is the net gain realized from sales or exchanges of property treated as capital assets, the entire amount of which was included in total income of the estate or trust. It is a combination of the net short-term capital gain or loss (including the capital loss carryover from 1949-53) and 100 percent of the net long-term capital gain or loss, which combination resulted in a net gain. In computing the net gain, the short- and long-term capital gains and losses received through business or partnerships and capital gains received from another fiduciary were included. The amount of net gain from sales of capital assets included in total income of the estate or trust is not reduced by 50 percent of the excess long-term capital gain over short-term capital loss as it is in the case of reporting capital gain in adjusted gross income on an individual return.

**Net loss from sales of capital assets** is the amount of loss allowed the estate or trust on account of sales or exchanges of property treated as capital assets. The allowable loss was deducted from gross income in determining the amount of total income of the estate or trust. In the computation of deductible loss, all short-term capital gains and losses (including the capital loss carryover from 1949-53) were merged with 100 percent of the long-term capital gains and losses. The resulting capital loss was allowed only to the extent of the smallest of the following amounts (a) capital loss, (b)

taxable income computed without regard to capital gains and losses and the deduction for exemption or (c) \$1,000. In merging the short- and long-term capital gains and losses, all such gains and losses sustained in business or received through partnerships, and capital gains received from other fiduciaries were included. The disallowed portion may be carried forward for 5 succeeding years as a short-term capital loss to the extent not eliminated in the interim.

**Short-term** applies to gains and losses from sale of capital assets held 6 months or less and such gains and losses, together with the capital loss carryover, are merged to obtain the net short-term capital gain or loss. In this merger, the net short-term capital gain or loss from partnerships and net short-term capital gain from other fiduciaries are also included.

**Long-term** applies to gains and losses from sale of property treated as capital assets if held more than 6 months. These are taken into account at 10 percent. Long-term capital gains and losses together with the net long-term capital gain or loss received through partnerships and the net long-term capital gain received from another fiduciary are merged to determine the net long-term capital gain or loss.

**Capital loss carryover from 1949-53** is the remaining portion of net capital loss sustained in those years but which the fiduciary has not yet been able to eliminate through his capital gains or the \$1,000 deduction allowed for capital loss in computing total income, in the years subsequent to the year in which the capital loss was sustained. This carryover is reported with and treated as a short-term capital loss in the 1954 income year.

**Net loss from sales of capital assets before limitation** is the entire net loss from sales or exchanges of property treated as capital assets and reported on returns with a capital loss deduction from gross income on account of this loss. It is a combination of the net short-term capital gain or loss including the capital loss carryover and the net long-term capital gain or loss, without regard to the statutory limitation on the allowable deduction.

**Net gain or loss from sales of property other than capital assets** is that resulting from sales or exchanges of property including business property none of which was treated as a capital asset. The net gain or net loss realized from such sales was ordinary gain or loss and, in either case, the amount thereof was used in its entirety for the computation of total income of the estate or trust.

Other sources of income include any type of income subject to income tax received by the estate or trust, not elsewhere tabulated.

### Deductions

Deductions allowed estates and trusts under the 1954 Code differ from those allowed under the 1939 Code. Each deduction was tabulated as reported on the return, so that the amount of any deduction in the tables, common to both laws, is a combination of the deduction reported sometimes under the 1939 Code and

sometimes under the 1954 Code. The explanations below describe deductions as allowed under the 1954 Code. Ninety-two percent of all returns reported deductions as provided under the new Code.

Interest paid or accrued is the interest expenses of the estate or trust, including that relating to rents and royalties, but excludes interest on business indebtedness (which is in other deductions) and interest expenses attributable to or allocable to tax-exempt securities or income.

Taxes are those paid or accrued during the tax year of the estate or trust, including taxes relating to rents and royalties, but exclude taxes relating to trade or business (which are in other deductions). Amounts deducted as taxes included taxes on real estate (except those assessed against local benefits which tend to increase the value of the property assessed), State and local income taxes, taxes paid to a foreign country or possession of the United States but only if no tax credit was claimed for such taxes, and in general other non-Federal taxes paid.

Depreciation is the fiduciary's portion of depreciation and depletion to which the estate or trust is entitled. In computing the taxable income of fiduciary, a deduction for depreciation and depletion was allowed only to the extent that these deductions were not allocated to the beneficiaries or to charitable gifts. In the allocation of amounts between fiduciary and others, depreciation and depletion relating to trade or business and to rents and royalties were included as well as that received as beneficiary from the distribution of another estate or trust. In the case of a trust, the apportionment between fiduciary and others was made in accordance with the governing instrument or, in the absence of such provisions, on the basis of income allocated to each. In the case of an estate, the apportionment between the fiduciary and others was made on the basis of income allocated to each.

Charitable deduction is allowed to an estate or trust for amounts of income which, pursuant to the governing instrument, were paid or set aside to be used exclusively for public purposes, or for religious, charitable, scientific, literary, or educational purposes, or for the prevention of cruelty to children or animals, or for the establishment, maintenance, and operation of public, nonprofit cemeteries. In computing the charitable deduction, the contributions made through business and partnership were included. The charitable deduction, under certain conditions, may be subject to the percentage limitations imposed on the charitable deduction of an individual, or denied to the extent that it can be traced to unrelated business income. Also, the charitable contributions are subject to adjustments in order to eliminate from the deduction any tax-exempt income and, where the contributions are deemed to include long-term capital gain, to prevent a double deduction relative to the excess capital gain.

Dividend exclusions relate to domestic dividends which were received by an estate or trust with a tax year ended after July 31, 1954 and which qualified for the exclusion. Since dividends were fully reported in total income, a fiduciary who retained

such dividends was allowed a deduction not to exceed \$50 in computing taxable income of fiduciary.

Distributions to beneficiaries pertain to amounts paid, credited, or required to be distributed to the beneficiaries of the estate or trust. The allowable deduction is equal to the sum of these distributions or to the amount of distributable net income, whichever is less, but for the purpose of this comparison both amounts must be adjusted to exclude items of tax-exempt income entering into the distributable net income.

Long-term capital gain deduction is allowed in computing taxable income of fiduciary in cases where a portion or all of the capital gain is retained by the estate or trust. The deduction is 50 percent of the excess net long-term capital gain over net short-term capital loss left in the hands of the fiduciary.

Exemption for an estate is \$600. For a trust required to distribute all of its income currently, it is \$300. All other trust are allowed \$100.

Other deductions include rent and royalty expenses other than interest, taxes, depreciation, and depletion; expenses of running a trade or business other than depreciation, depletion, and charitable contributions; bond amortization; net operating loss deduction; nonbusiness losses arising from fire, storm, or other casualty, or from theft; and other nonbusiness expenses such as that incurred for the production or collection of income subject to tax, or for the management, conservation, and maintenance of property held for the production of income subject to tax.

#### Measures of Fiduciary Income

Since the 1954 Code does not apply to estates and trusts with year ended before August 17, 1954, nor to any year beginning in 1953, the income on such returns was reported according to the 1939 Code. Consequently, the income tabulated contains income reported under rules of the 1939 Code as well as under the 1954 Code. Only income items under the 1954 Code are described. A majority of the returns was filed under the provisions of the new Code.

Total income of the estate or trust as reported under the 1954 rules is the sum of dividends before exclusions, interest received, partnership profit or loss, income or loss from another fiduciary, gross receipts from rents and royalties, gross profit or loss from trade or business, net gain from sales of capital assets and of other property, allowable loss from sales of capital assets and of other property, and other sources of income as reported on each return. Rents and royalties income, business profit or loss, and capital gain were reported on a gross basis for the first time.

Deficit in total income of an estate or trust existed when the losses allowed for the computation of total income exceeded the positive items of income entering into the composition of total income.

Taxable income of fiduciary is the amount of income for the current year that is retained by the fiduciary of the estate or trust. It is the excess of total income over total deductions. Taxable in-

come is the base upon which the tax was computed. If the numerous changes for reporting income and deductions under the 1954 Code are ignored, the concept of taxable income may be considered similar to that of surtax net income under prior law. Therefore, for returns subject to the 1939 Code, the surtax net income was substituted for the taxable income of fiduciary.

#### Tax Items

On any fiscal year or part-year return with an accounting period that included January 1, 1954, the income tax was prorated to give effect to the different rates applying to income received in 1953 and 1954. The rates on 1954 income retained by the fiduciary were 20 percent of the taxable income of fiduciary not in excess of \$2,000 increasing to 91 percent of taxable income in excess of \$200,000, but the maximum tax did not exceed 87 percent of the taxable income. The income tax rates on 1954 income were somewhat lower than on 1953 income.

Income tax before credits is the tax based on taxable income retained by the fiduciary. It may be either the normal tax and surtax or the alternative tax, and it is prior to the deduction of tax credits allowed the fiduciary.

Normal tax and surtax, the regular income tax, occurred on returns for estates and trusts unless the alternative tax relating to capital gains was imposed.

Alternative tax applied only if it was less than the regular income tax and only when the fiduciary retained some portion of the excess long-term capital gain over short-term capital loss on returns with taxable income of fiduciary greater than \$18,000. The special rate of 25 percent applied to the entire excess long-term capital gain retained by the fiduciary.

Tax credit for foreign tax paid is the fiduciary's share of the tax credit allowed on account of income, war profits, or excess profits taxes paid to

a foreign country or to a possession of the United States. The fiduciary's share was equal to the total allowable credit for such foreign taxes paid minus the proportionate share of credit allocated to the beneficiaries.

Tax credit for tax paid at source is the fiduciary's share of tax credit allowed for tax withheld and paid, by the debtor corporation, on interest from tax-free covenant bonds. The tax credit allowed against the income tax of the fiduciary was equal to the total tax withheld (usually 2 percent of interest earned) minus the amount of tax withheld allocated to the beneficiaries.

Tax credit for dividends received is allowed only on returns of estates and trusts with a tax year ended after July 31, 1954. Dividends received credit was allowed the fiduciary to the extent of 4 percent of domestic corporation dividends received after July 31, 1954 and included in gross income, but only with respect to so much of such dividends as were not included in the gross income of any beneficiary. Furthermore, the fiduciary's credit was limited to the smaller of (a) tax before credits reduced by foreign tax credit, or (b) 2 percent of taxable income of fiduciary.

Tax credit for partially tax-exempt interest is allowed in the amount of 3 percent of partially tax-exempt interest received by the estate or trust reduced by the amount of such interest reported in gross income of beneficiaries and the amortized bond premium with respect to the bonds yielding the interest upon which the credit was claimed. However, the credit allowed the fiduciary could not exceed the smallest of (a) tax before credits reduced by credit for foreign tax paid and for dividends received, (b) 3 percent of taxable income of fiduciary, or (c) if alternative tax was applicable, 3 percent of the ordinary income.

Income tax liability after credits is the income tax remaining after the four tax credits were deducted. It was the net tax liability reported by the fiduciary at time of filing the return.

# SYNOPSIS OF FIDUCIARY INCOME TAX LAW

37

Table A.—REQUIREMENT FOR FILING RETURN AND EXEMPTION UNDER THE FIDUCIARY INCOME TAX LAW, 1945-54<sup>1</sup>

Federal income tax law (date of enactment)	Income year <sup>2</sup>	Requirement for filing return <sup>3</sup>			Exemption <sup>4</sup>		
		Estates, gross income <sup>5</sup>	Trusts		Estates	Trusts	
			Gross income <sup>5</sup>	Net income <sup>6</sup>		Simple	Complex
		Dollars	Dollars	Dollars	Dollars	Dollars	Dollars
Internal Revenue Code of 1954 (Aug. 16, 1954).....	1954.....	600	600	( <sup>7</sup> )	600	300	100
Internal Revenue Code of 1939 amended by—							
Revenue Act of 1951 (Oct. 20, 1951).....	1948-53.....	600	600	100	600	100	
Revenue Act of 1950 (Sept. 23, 1950).....							
Revenue Act of 1948 (Apr. 2, 1948).....							
Revenue Act of 1945 (Nov. 8, 1945).....	1945-47.....	500	500	100	500	100	
Individual Income Tax Act of 1944 (May 29, 1944)...							

<sup>1</sup>This table relates only to fiduciaries in the United States. Fiduciary returns are filed for the income of estates under administration and for the income from property held in trust. For income years prior to 1945, see *Statistics of Income for 1950, Part 1*, pages 308-309.

<sup>2</sup>Returns are permitted for fiscal years also. Fiduciary returns with tax year beginning in 1953 and part year returns with accounting period ending before Aug. 17, 1954 were subject to the 1939 Code.

<sup>3</sup>In addition to the requirement stated in the table, every fiduciary, or one of joint fiduciaries, must file a return, Form 1041, regardless of the amount of gross or net income, for every estate or trust for which he acts if any beneficiary is a non-resident alien.

<sup>4</sup>Exemption was allowed as a credit against net income for both normal tax and surtax, prior to 1954, and under the 1954 Code, exemption is allowed as a deduction in computing taxable income of the fiduciary.

<sup>5</sup>Gross income includes all gains, profits, and income derived from whatever source except income that is specifically exempt from income tax.

<sup>6</sup>Net income, or taxable income under the 1954 Code, is the amount of income remaining in the hands of the fiduciary after allowable deductions and distributions to beneficiaries.

<sup>7</sup>A return is required for the income of a trust if there is any amount of taxable income, as defined in note 6.

Table B.—MINIMUM AND MAXIMUM INCOME TAX RATES UNDER FIDUCIARY INCOME TAX LAW, 1945-54<sup>1</sup>

Federal income tax law (date of enactment)	Income year <sup>2</sup>	Tax rate <sup>3</sup>					Maximum rate limita- tion <sup>7</sup>
		Normal tax rate <sup>4</sup>	Surtax rate <sup>5</sup> for—		Combined normal tax and surtax rates <sup>6</sup> at—		
			Lowest bracket of surtax income, not over \$2,000	Highest bracket of surtax income, over \$200,000	Lowest bracket of surtax income	Highest bracket of surtax income	
		Percent	Percent	Percent	Percent	Percent	Percent
Internal Revenue Code of 1954 (Aug. 16, 1954).	Calendar year 1954.....	-	-	-	20.0	91.0	87.0
Internal Revenue Code of 1939 amended by—							
Revenue Act of 1951 (Oct. 20, 1951).....	Calendar years 1952-1953.... Fiscal years beginning after Oct. 31, 1951 and ending before Jan. 1, 1954. Calendar year 1951..... Fiscal years beginning after Sept. 30, 1950 and ending before Nov. 1, 1951.	3.0 3.0 3.0	19.2 17.4 17.0	89.0 88.0 88.0	22.2 20.4 20.0	92.0 91.0 91.0	88.0 87.2 87.0
Revenue Act of 1950 (Sept. 23, 1950)....	Calendar year 1950..... Fiscal years ending after Dec. 31, 1949 and before Oct. 1, 1950. Calendar years 1948-1949....	3.0 3.0	17.0 17.0	88.0 88.0	17.4 16.6	84.4 82.1	80.0 77.0
Revenue Act of 1948 (Apr. 2, 1948).....	Calendar years 1946-1947....	3.0	17.0	88.0	19.0	86.5	85.5
Revenue Act of 1945 (Nov. 8, 1945).....	Calendar year 1945.....	3.0	20.0	91.0	23.0	94.0	90.0
Individual Income Tax Act of 1944 (May 29, 1944).							

<sup>1</sup>This table relates only to rates for fiduciaries in the United States. Fiduciary returns are filed for the income of estates under administration and for the income from property held in trust. For tax rates prior to 1945, see *Statistics of Income for 1950, Part 1*, pages 308-309 and 318-321.

<sup>2</sup>In case of a change in tax rates during a fiscal year other than those listed, the total tax is prorated according to the portion of time in the tax year under each rate.

<sup>3</sup>For 1946 through calendar year 1950, the normal tax and surtax rates produced a tentative tax which was subject to reduction as described in note 6.

<sup>4</sup>The normal tax rate applies to normal tax net income which is net income less the credit for partially tax-exempt interest and the exemption allowed for normal tax.

<sup>5</sup>Surtax rates apply to surtax net income which is net income less the exemptions allowed for surtax.

<sup>6</sup>For 1946 through calendar year 1950, the combined rates shown are after tax reductions and the rates so computed are rounded. For 1946 and 1947 the tentative normal tax and surtax are reduced by 5 percent thereof. For tax years beginning after Dec. 31, 1947 and ending before Oct. 1, 1950, the combined tentative normal tax and surtax is reduced by 17 percent of the first \$400, plus 12 percent of the next \$99,600, plus 9.75 percent of the excess over \$100,000. For calendar year 1950, the tentative normal tax and surtax are reduced by 13 percent of the first \$400, plus 9 percent of the next \$99,600, plus 7.3 percent of the excess over \$100,000.

<sup>7</sup>The combined normal tax and surtax shall not exceed the indicated percent of net income for 1945-53, or taxable income for 1954.

1. Total of column 3, Schedule H	\$
2. Total of column 4, Schedule H	\$
3. Total (line 1 plus line 2) (Fiduciaries required by the governing instrument to distribute all of the income determined under that instrument who have not paid or credited and are not required to pay or credit other amounts to any beneficiary during the taxable year and have not claimed a charitable deduction need not complete line 4).	\$
4. (a) Enter the total of column 10, Schedule H	\$
(b) Portion of total in columns 6A and 6B, Schedule H, attributable to dividends excluded in line 18, page 1 (not to exceed \$50.00)	
(c) Total (line 4 (a) plus line 4 (b))	
5. Balance (line 3 minus line 4 (c))	\$
6. Enter distributable net income (line 5, Schedule G)	\$
7. Enter the total of lines 2 (a) and 2 (b) of Schedule G	\$
8. Dividends excluded (line 18, page 1)	
9. Total (line 7 plus line 8 above)	
10. Balance (line 6 minus line 9)	\$
11. Distributions deduction. (Enter here and as line 19, page 1, the lesser of line 5 or line 10 above)	\$

Schedule K.—CAPITAL GAINS DEDUCTION AND ALTERNATIVE TAX (See Instruction 38)  
COMPUTATION OF FIDUCIARY'S CAPITAL GAINS DEDUCTION

1. (a) Long-term capital gain shown in line 2, column 3, Schedule D	\$
(b) Short-term capital loss shown in line 1, column 3, Schedule D	
(c) Excess of line 1 (a) over line 1 (b), above	\$
(d) Long-term capital gains taxable to beneficiary. (Total column 9, Schedule H)	
(e) Balance (line 1 (c) minus line 1 (d)). (Enter 50% of this amount as line 20, page 1)	\$

## COMPUTATION OF ALTERNATIVE TAX

Use only if you had a net long-term capital gain or an excess of net long-term capital gain over net short-term capital loss, and line 23, page 1, exceeds \$18,000

2. Income from line 23, page 1	\$
3. 50% of amount on line 1 (e), above	
4. Balance (line 2 minus line 3)	\$
5. Tax on amount on line 4 (See Tax Rate Schedule in Instruction 24)	\$
6. 50% of amount on line 3, above	
7. Alternative tax (line 5 plus line 6); if less than line 24, page 1, enter this amount as line 25, page 1	\$

## ADDITIONAL INFORMATION REQUIRED

- Was an income tax return filed for the preceding year? (Answer "Yes" or "No")  
If answer is "Yes," to which District Director's office was it sent?
- Date estate or trust was created
- If copy of will or trust instrument and statement required under General Instruction I have been previously furnished, state when and where filed.
- If return is for a trust, state name and address of grantor:
- If return is for an estate, has a United States Estate Tax Return been filed? (Answer "Yes" or "No")  
If answer is "No," will such a return be filed? (Check which)  
☐ Yes ☐ No ☐ Uncertain
- Did you pay anyone for assistance in the preparation of your return? (Answer "Yes" or "No")  
If "Yes," enter his name and address.

1954

# Instructions For Form 1041

## U.S. FIDUCIARY INCOME TAX RETURN

### GENERAL INSTRUCTIONS

(References are to the Internal Revenue Code of 1954, unless otherwise noted)

**A. Who must use Form 1041.**—Every fiduciary (except a receiver appointed by authority of law in possession of only a part of the property of an individual), or at least one of joint fiduciaries, must make an income tax return on Form 1041 for:

(1) Every estate for which he acts, if (a) the gross income of such estate for the taxable year is \$600 or over, or (b) any beneficiary is a nonresident alien;

(2) Every trust for which he acts, if (a) the trust has any taxable income for the taxable year, or (b) the gross income is \$600 or over, regardless of the amount of taxable income, or (c) any beneficiary is a nonresident alien.

**B. Fiduciary returns on Form 1040 or Form 1040A.**—(1) *Returns for decedents.*—An executor or administrator must make a return on Form 1040 or Form 1040A for the taxable year of the decedent, if the gross income of the decedent to the date of his death was \$600 or more (\$1,200 or more if the decedent was over 65 years of age and his last taxable year began after 1953 and ended after August 16, 1954).

(2) *Medical expenses of decedents.*—Expenses for medical care of the decedent, paid out of his estate within one year from the date of his death, shall be treated as paid by the decedent at the time the expenses were incurred for purposes of determining the decedent's income tax liability. Such a deduction is not permitted if the amount so paid is also allowable in computing the net estate of the decedent for estate tax purposes under section 2053 unless the statement and waiver referred to in specific instruction 15 for estate tax deduction is filed.

(3) *Other returns.*—A fiduciary, including the guardian of a minor and the guardian or committee of an insane person, who has charge of the income of an individual (except a receiver appointed by authority of law in possession of only a part of the property of an individual), must make a return of income on Form 1040 or Form 1040A if a return is required for such individual.

**C. Returns for nonresident alien beneficiaries.**—(1) *United States business.*—A citizen or resident fiduciary who pays, credits, or is required to distribute any amount taxable to a beneficiary who is a nonresident alien engaged in trade or business within the United States at any time within the taxable year, shall make a return on Form 1040B for such nonresident alien and pay the tax due.

(2) *No United States business.*—A citizen or resident fiduciary who pays, credits, or is required to distribute any amount taxable to any beneficiary who is a nonresident alien not engaged in trade or business within the United States at any time within the taxable year shall make a return on Form 1040NB, and pay the tax due, if (a) such beneficiary has, for the taxable year, not more than \$15,400 gross income described in section 871 (a) and if (b) the entire amount of the tax on such income has not been withheld at the source. Such fiduciary shall make a return on Form 1040NB-a for any such beneficiary who has, for the taxable year, more than \$15,400 gross income described in section 871 (b), and pay the tax due.

(3) *Duty of filing returns.*—If the beneficiary appoints a person in the United States to act as his agent for the purpose of rendering income-tax returns, the fiduciary shall be relieved from the necessity of filing Form 1040B, Form 1040NB, or Form 1040NB-a, as the case may be. In such a case the fiduciary shall make a return on Form 1041 and attach thereto a copy of the notice of appointment of such agent. The fiduciary shall make a return on Form 1042 of the tax on the entire amount of income payable to the beneficiary.

**D. Period to be covered by return.**—Returns shall be filed for the calendar year 1954 or other taxable years beginning in 1954. If the taxable year of the estate or trust began in 1953, or ended before August 17, 1954, the Internal Revenue Code of 1939 applies to such a taxable year and the return must be made on Form 1041 for 1953, not on Form 1041 for 1954.

For the procedure to follow in changing an established accounting period, see the District Director of Internal Revenue.

**E. When and where the return must be filed.**—Returns must be filed on or before the 15th day of the 4th month following the close of the taxable year of the estate or trust with the District Director of Internal Revenue for the district in which the fiduciary resides or has his principal place of business. If

the fiduciary has no legal residence or place of business in the United States, the return should be filed with the District Director of Internal Revenue, Baltimore 2, Md.

**F. Signature and verification.**—The return must be signed by the individual fiduciary, or by the authorized officer of the organization receiving or having custody or control and management of the income of the estate or trust. If two or more individuals act jointly as fiduciaries, the return may be signed by any one of them.

The statement at the bottom of page 1 of the Form 1041 is required to be signed by any person or in the name of any firm, or corporation preparing the fiduciary's return.

**G. When and to whom the tax must be paid.**—The tax of a trust must be paid in full when the return is filed. The tax of an estate must be paid in full when the return is filed or in four equal installments on or before the 15th day of the 4th, 7th, 10th, and 13th month following the close of the taxable year. If any installment is not paid on or before the date fixed for payment, the whole amount of tax unpaid shall be paid upon notice and demand by the district director.

The tax may be paid in cash or by check or money order drawn to the order of "District Director, I. R. S."

**H. Penalties.**—Severe penalties are provided by law for failure to file a required return, for filing late, and for filing a false or fraudulent return.

**I. Copy of governing instrument and fiduciary's declaration.**—If the gross income of the estate or trust is \$5,000 or over, a copy of the will or trust instrument sworn to by the fiduciary as a true and complete copy must be filed with the return of the estate or trust.

Together with the return, the fiduciary shall also file a statement of his opinion (indicating the relevant provisions of the governing instrument upon which he relies) of the extent to which the income of the estate or trust is taxable to the estate or trust, to the beneficiaries, or to the grantor or a person other than the grantor. In making such determination, the fiduciary shall give particular attention to sections 671 through 678 which relate (a) to taxation of the income of a trust to the grantor because of his retention or possession of (i) a reversionary interest, (ii) a power to revoke or to control beneficial enjoyment, (iii) administrative powers, or (iv) the right to income, and (b) which relates to the taxation of the income of a trust to a person other than the grantor because of the possession of such power over the trust as would constitute such a person the substantial owner of all or a portion of the trust.

If a copy of the will or trust instrument, or opinion relating to the provisions of the will or trust instrument, has once been filed with an income-tax return, neither one need be filed again if the return contains a statement showing when and where such copy or opinion was filed.

If the trust instrument is amended in any way after a copy has been filed, a copy of the amendment must be filed together with the return for the taxable year in which the amendment is made. A statement must also be filed by the fiduciary setting forth his opinion of the effect of the amendment upon whether the trust income is taxable to the trust, to the beneficiaries, or to the grantor or a person other than the grantor.

**J. Accounting methods.**—Taxable income shall be computed in accordance with the method of accounting used in computing income from books and records. In all cases the method adopted should clearly reflect taxable income. The basic methods of accounting are the "cash receipts and disbursements method" and the "accrual method," but section 446 permits the use of other methods in accordance with regulations. It is permissible to use a different method of accounting for each trade or business, if a taxpayer is engaged in more than one trade or business. In most cases, consent of the Commissioner must be obtained before changing the method of accounting used in computing taxable income. For information, consult regulations or the District Director of Internal Revenue.

*Prepaid income and reserves for estimated expenses.*—Under the new law a taxpayer using the accrual method of accounting in a trade or business may elect to take prepaid income into account in the year of receipt, and subsequent taxable years (not to exceed five except with the consent of the Commissioner),

## PAGE 2

and may elect to deduct for the taxable year additions to reserves for estimated expenses. Prepaid income is income received in a transaction in which the taxpayer undertakes to render services, furnish goods or other property, or allow the use of property beyond the end of the taxable year. Estimated expenses are expenses part or all of which would, under section 461, be taken into account in subsequent taxable years but which will, when incurred, be attributable to income of the current taxable year and which can, in the opinion of the Commissioner, be estimated with reasonable accuracy. The election to take estimated expenses into account does not apply to expenses attributable to income which the taxpayer elects to treat as prepaid income nor does it apply to additions to reserves for bad debts.

For information concerning the requirements applicable to elections with respect to prepaid income and estimated expenses and the detailed statements which must be submitted when making such election, consult your District Director of Internal Revenue.

**K. Income in respect of decedents.**—Amounts of gross income in respect of a decedent, not includible in his gross income, shall be included when received in the gross income of his estate, legatee, or other person entitled to receive such amounts upon his death.

Deductions specified in sections 162, 163, 164, or 212 (relating to deductions for business expenses, interest, taxes, and expenses for the production of income) or the foreign tax credit provided by section 33, in respect of the decedent which is not properly allowable to the decedent in respect of the taxable period in which falls the date of his death or a prior period, may be taken by the decedent's estate or the person receiving the property of the decedent subject to the obligation for which the deduction (or credit) is allowed. Deductions for percentage depletion specified in section 611, not allowable to the decedent for any taxable period, may be taken by the person receiving the income in respect of the decedent to which such deduction relates.

The recipients of payments of installment obligations or the proceeds derived from their sales or satisfaction at other than face value will be taxed in accordance with the provisions of section 691 (a) (4). In cases involving successive decedents, see section 691.

**L. Items exempt from tax.**—Certain items of income are exempt from tax. Some of these are as follows:

(1) *Interest on governmental obligations:*

(a) *Entirely exempt.*—The interest on (1) obligations of a State, Territory, or a possession of the United States, or any political subdivision of the foregoing, or of the District of Columbia; (2) obligations of the United States issued on or before September 1, 1917; (3) all postal savings bonds; (4) interest on any aggregate not exceeding \$5,000 principal amount of Treasury bonds issued prior to March 1, 1941.

(b) *Partially exempt.*—On certain United States securities issued prior to March 1, 1941, the interest was exempt from the normal tax by the acts authorizing their issuance. A tax credit in an equivalent amount is now allowed. See specific instruction 29.

(2) *Proceeds of insurance policies.*—In general, a lump sum payable at the death of the insured under a life insurance policy is excludable from the gross income of the recipient. When, however, the beneficiary of a life insurance contract leaves a sum on deposit with the insurer, and receives interest on it under an agreement with the insurer, the interest is includible in its entirety in such beneficiary's gross income. If the beneficiary receives, through an option or otherwise, installment payments after the death of the insured, there may be excluded from income a part or all of the amounts so received. See sections 72 and 101.

(3) *Miscellaneous items wholly exempt from tax:*

(a) Gifts (not received as a consideration for service rendered) and money or property acquired by bequest, devise, or inheritance (but the income derived therefrom is taxable);

(b) Income, other than rent, derived by a lessor of real property upon the termination of a lease, representing the value of such property attributable to buildings erected or other improvements made by the lessee;

(c) Income attributable to the recovery during the taxable year of a bad debt, prior tax, or delinquency amount, to the extent that such bad debt, tax, or delinquency amount did not

operate to reduce the income tax liability of the taxpayer for any prior year with respect to such debt, tax, or amount; and

(d) Certain death benefits received from a decedent's employer. (See section 101 (b).)

(4) *Certain dividends.*—See specific instruction 18.

**M. Depreciation and depletion, and amortization of emergency facilities.**—For instructions with respect to depreciation and depletion, see specific instruction 40. For instructions with respect to amortization deductions, see specific instruction 15.

**N. Information at source.**—Every estate or trust engaged in a trade or business and making payment in the course of such trade or business to another person of rent, salaries, wages, premiums, annuities, compensations, remunerations, emoluments or other fixed or determinable gains, profits and income of \$600 or more in any taxable year must make a return on Forms 1096 and 1099. If a portion of such salary or wage payments was reported on a Withholding Statement (Form W-2, Copy A) only the remainder must be reported on Form 1099. Distributions to beneficiaries of an estate or trust shall be reported on Form 1041 and not on Form 1099.

**O. Separate shares in a single trust.**—If (1) the governing instrument provides substantially separate and independent shares for beneficiaries of a single trust, (2) the trust is administered by the fiduciary as if such shares were independent trusts, and (3) the Regulations permit, then the separate shares may be treated as separate trusts solely for the purpose of determining distributable net income. (See section 663 (c).) Distributable net income is described in specific instruction 35.

The treatment of separate shares in a single trust as separate trusts does not permit the fiduciary to claim more than one deduction in lieu of the deduction for personal exemption or to split the taxable income of the trust into separate shares in order to determine the tax liability of the trust.

If separate shares in a single trust are treated as separate trusts under this paragraph, a Form 1041 for each separate share must be completed (except for lines 18 through 31, page 1), identified as an attachment to the Form 1041 upon which the tax liability of the fiduciary is computed, and filed with that form.

**P. Unused loss carryovers and excess deductions on termination.**—A deduction shall be allowed to the beneficiaries succeeding to the property of the estate or trust, if upon termination the estate or trust has (1) a net operating loss carryover under section 172 or a capital loss carryover under section 1212, or (2) for its last taxable year deductions (other than the personal exemption or charitable deduction) in excess of gross income for such year.

**Q. Income taxable to the grantor or substantial owner.**—If any part of the income of the trust is taxable to the grantor under section 673, 674, 675, 676, or 677, or is taxable to another person under section 678, such part should not be reported on Form 1041, but such income and the amount of deductions and credits applicable thereto should be shown in a separate statement to be attached to Form 1041.

**R. Simple and complex trusts.**—If the terms of the governing instrument of a trust require that all of its income (determined under the governing instrument and local law) be distributed currently and do not provide that any amounts are to be paid, permanently set aside, or used for the charitable purposes specified in section 642 (c), such a trust may qualify as a "simple" trust under section 651 (a). Such a trust is qualified under section 651 (a) only in those taxable years of the trust in which it does not distribute to a beneficiary amounts other than amounts of income (determined under the governing instrument and local law) required to be distributed currently. An estate may not qualify under section 651 (a).

Any trust which does not qualify for the taxable year under section 651 (a) is treated as a "complex" trust under section 661 (a). All estates are treated under section 661 (a) in the same manner as "complex" trusts.

The rules for computing the taxable income of a "simple" trust and the amounts to be included in the gross income of the beneficiaries of a "simple" trust are basically the same as those which apply to a "complex" trust or to an estate. (See specific instruction 36.) The general instructions above and the specific instructions below apply to all trusts and estates except where there is a specific distinction made between "simple" trusts on the one hand and estates or "complex" trusts on the other.

## SPECIFIC INSTRUCTIONS

The following instructions are numbered to correspond with line numbers on the first page of the return and supporting schedules

**1. Dividends.**—Enter in line 1 the total of all taxable dividends without regard to the dividend exclusion (except so-called "dividends" described in (d) of specific instruction 18 which are to be reported as interest on line 2, page 1).

For computation of the dividends received credit, see specific instruction 42.

**4. Interest on Government obligations, etc.**—Enter interest on Government obligations, etc., except interest fully exempt from tax. See general instruction L.

A taxpayer on the cash basis may elect, as to all non-interest-bearing obligations issued at a discount and redeemable for fixed amounts increasing at stated intervals (for example,

United States Savings bonds), to include the increase in redemption price applicable to the current year. For the year of election, the total increase in redemption price of such obligations occurring between the date of acquisition and the end of the year must be included. A taxpayer so electing shall report such income as interest in line 2, 3, or 4 (whichever is applicable), page 1, and attach a statement listing the obligations owned and the computation of accrued income. An election exercised in the current year or in a prior year is binding for all subsequent years.

**5. Income from partnerships and other fiduciaries.**—Except as directed below, enter the estate's or trust's share of the income (whether received or not) or of the losses of a partnership (including a syndicate, pool, etc., not taxable as a corporation) and income received by the estate or trust from another fiduciary. Schedule K of the Partnership return (Form 1065) shows the partner's share of income and credits. The estate's or trust's distributive share of partnership capital gains or losses and income received by the estate or trust from another fiduciary which is in the nature of capital gains should be reported in separate Schedule D, and should not be included in line 5. See specific instruction 32. The estate's or trust's share of partnership dividend income or income received by the estate or trust from another fiduciary which is in the nature of dividend income should be included only in line 1, page 1, according to specific instruction 1. The estate's or trust's distributive share of partnership tax-exempt interest or income received by the estate or trust from another fiduciary in the nature of tax-exempt interest, should be taken into account in computing line 2, Schedule E, and line 2 (a), Schedule G, according to specific instructions 33 and 35, respectively. The estate's or trust's share of interest from obligations of the United States owned by a partnership or income received by the estate or trust from another fiduciary which is in the nature of interest on obligations of the United States should be included in line 4, page 1.

The estate's or trust's share of credits for income and profits taxes paid to a foreign country or U. S. possession, Federal income taxes paid at source on tax-free covenant bond interest, dividends received and partially tax-exempt interest which are attributable to income received from partnerships or other fiduciaries will be included in lines 26, 27, 28, and 29, page 1, according to the specific instructions for those lines.

If the estate or trust as the beneficiary of another trust or an estate is to receive the benefit of any portion of the depreciation or depletion deduction allowed to the other trust or estate that amount must be included in Schedule M and treated according to specific instruction 40. No deduction (other than depreciation or depletion) of another trust or estate may be claimed by the taxpayer, except those which fall within general instruction P.

If the taxable year on the basis of which the estate's or trust's return is filed does not coincide with the annual accounting period of the partnership or other fiduciary, include in the return of the estate or trust its portion of the above items for the accounting period of the partnership or other fiduciary ending within the estate's or trust's taxable year.

**6. Rents and royalties.**—Enter the gross amount received or accrued as rents or royalties. Any deductions claimed for interest, taxes, depreciation or depletion and repairs, should be included in lines 11, 12, 13, and 15, respectively.

**7. Profit (or loss) from trade or business.**—If the estate or trust was engaged in a trade or business during the taxable year, there shall be attached to the return a statement showing the nature of the trade or business and the net business income as follows:

Gross sales or receipts	XXXXXX
Less: Cost of goods sold	XXXXX
Gross profit (or loss)	XXXXX
Add: Other income, if any	XXXXX
Total income (or loss)	XXXXX
Less: Deductible expenses	XXXXX
Net business income (or loss)	XXXXX

In the cost of goods sold, show cost of merchandise purchased for manufacture or sale, inventories of merchandise on hand at the beginning and end of the taxable year (indicate method of valuing inventories), other items entering into cost of goods sold. Enter in line 7, page 1, the gross profit (or loss) from the attached statement. The items of other income on the attached statement shall be included in the appropriate line on the form according to the character of such income. Show on the statement the amount of each type of deductible expense (such as salaries and wages of employees, interest, taxes, losses, bad debts directly attributable to the trade or business, depre-

ciation, obsolescence, and depletion of property used in the trade or business, rent, and repairs) not included in cost of goods sold. The total deductible expenses, other than depreciation, depletion, and charitable contributions shall be included in line 15, page 1. See specific instructions 33 and 40 with respect to deductions for charitable contributions, depreciation, and depletion.

**Inventories.**—If the trust or estate engages in a trade or business in which the production, manufacture, purchase, or sale of merchandise is an income-producing factor, inventories of merchandise and materials on hand should be taken at the beginning and end of the taxable year. The usual methods of valuing inventory are (a) cost, or (b) cost or market, whichever is lower. The method properly adopted for the first year in which inventory is taken must be continued unless permission to change is secured from the Commissioner. Application for permission to change the method of valuing inventories shall be made in writing and filed with the Commissioner within 90 days after the beginning of the taxable year in which it is desired to make the change. If the estate or trust elects to use the last-in, first-out inventory method provided in section 472, there should be filed an election on Form 970.

**Bad debts.**—Bad debts may be deducted either (a) when they become wholly or partially worthless, or (b) by a reasonable addition to a reserve. No change of method may be made without permission of the Commissioner.

**Installment sales.**—If the installment method is used, attach to the return a schedule showing separately for the years 1951, 1952, 1953, and 1954 the following: (a) gross sales; (b) cost of goods sold; (c) gross profits; (d) percentage of gross profits to gross sales; (e) amount collected; and (f) gross profit on amount collected. Under certain conditions casual sales of personalty may be reported on the installment method. See section 453.

**8. Sales and exchanges of property.**—Gains and losses from the sale or exchange of property other than capital assets must be reported on separate Schedule D, and the amount from line 2, separate Schedule D must be carried to line 8 (a), page 1. For capital transactions, see specific instruction 32.

**9. Other income.**—If the estate or trust had any taxable income, space for reporting which is not provided elsewhere on page 1, enter it in line 9, page 1, and show the nature of such income, attaching a separate sheet if necessary for that purpose.

**11. Interest.**—Enter all interest paid or accrued, other than on business indebtedness (which should be treated according to specific instruction 7). Do not include interest on indebtedness incurred or continued to purchase or carry obligations which yield interest wholly exempt from taxation (except obligations of the United States issued after September 24, 1917, and originally subscribed for by the taxpayer). Do not include any other amounts of interest attributable to or allocable to tax-exempt interest (see line 2 (a), Schedule G, and specific instruction 35). Deductions on account of interest should be explained and itemized in Schedule N. As to disallowances of unpaid interest due related persons, see section 267.

**12. Taxes.**—Enter on page 1 and explain in Schedule N deductible taxes paid or accrued during the taxable year by the estate or trust. In general, non-Federal taxes are deductible; Federal import duties, and Federal excise and stamp taxes are deductible only if paid or incurred in carrying on a trade or business or in the production or collection of income or in the management, conservation or maintenance of property held for the production of income. Taxes on property used in the trade or business of the estate or trust are to be treated in accordance with specific instruction 7. The following taxes are not deductible: (i) generally, taxes assessed against local benefits of a kind tending to increase the value of the property assessed; (ii) Federal import duties and Federal excise and stamp taxes other than those mentioned above; (iii) Federal income taxes, estate, except as indicated in the next paragraph, inheritance, succession or gift taxes; (iv) taxes imposed upon the interests of the estate or trust as a shareholder of a corporation which are paid by the corporation without reimbursement from the estate or trust; and (v) any portion of income, war profits or excess profits taxes paid or accrued to a foreign country or United States possession if any credit is claimed in line 26, page 1.

Section 691 provides that a taxpayer required to include in gross income any amount in respect of a decedent may deduct that portion of the estate tax on the decedent's estate which is attributable to the inclusion in the decedent's estate of the right to receive such amount. If an estate or trust receives income in respect of a decedent which is paid, credited, or required to be distributed to a beneficiary see section 691 (c) (1) (B).

**13. Fiduciary's portion of depreciation and depletion.**—See specific instruction 40.

**14. Charitable deduction.**—See specific instruction 33.

## PAGE 4

**15. Other deductions authorized by law.**—Enter the total of any authorized deductions for which no other space is provided on page 1, and explain in Schedule N. Examples of such deductions are:

**Nontrade or nonbusiness expenses.**—Include nontrade or nonbusiness expense incurred either (a) for the production or collection of taxable income, (b) for the management, conservation, or maintenance of property held for the production of taxable income, or (c) in connection with the determination, collection, or refund of any tax. Worthless bonds and similar obligations and nonbusiness bad debts should be included in separate Schedule D as losses on capital assets.

**Estate tax deductions.**—Items allowable under sections 2053 relating to expenses, indebtedness and taxes, and 2054 relating to losses (or the corresponding provisions of prior Federal estate tax laws) as deductions in computing the taxable estate of a decedent are not allowed as deductions in computing the taxable income of the estate unless there is filed for association with the return in which the items are claimed as deductions, a statement to the effect that the items have not been allowed as deductions from the gross estate of the decedent under the applicable Federal estate tax law and a waiver of any and all right to have such items allowed at any time as deductions under the applicable Federal estate tax law. This paragraph shall not apply with respect to deductions allowed under section 691, relating to income in respect of a decedent. Clearly identify any such items in the statement and waiver and in Schedule N.

**Bond premium.**—Section 171 provides for amortization of bond premium. The term "bond" means any bond, debenture, note, certificate, or other evidence of indebtedness, issued by any corporation and bearing interest (including any like obligations issued by a government or a political subdivision thereof), but does not include any such obligation which constitutes stock in trade of the taxpayer or any such obligation of a kind which would properly be included in the inventory of the taxpayer if on hand at the close of the taxable year, or any such obligation held by the taxpayer primarily for sale to customers in the ordinary course of its trade or business.

In the case of fully taxable bonds, and partially tax-exempt bonds the interest on which is the basis of a credit (see specific instruction 29), the amortization of bond premium is elective, and the election may be made with respect to either class held by the taxpayer, or both. The premium on fully taxable bonds may be amortized to maturity, or to the date on which the bond is first callable. But, in the case of such bonds issued after January 22, 1951, and acquired after January 22, 1954, if the earliest call date is not more than 3 years from the date of issuance of the bond, the bond premium must be amortized to the maturity date of the bond rather than to the earliest call date.

The election to amortize bond premium shall be made by the taxpayer by taking a deduction for the bond premium on the return for the first taxable year to which the taxpayer desires the election to apply. Attach a statement showing the computation of the deduction. The election shall apply to all bonds of the class (or classes) with respect to which it was made which were owned by the taxpayer at the beginning of the first taxable year to which the election applies and also to all bonds of such class (or classes) thereafter acquired. The election shall be binding for all subsequent taxable years, unless, upon application by the taxpayer, the Commissioner permits the taxpayer to revoke the election. In case of bonds held by an estate or trust the election shall be made only by the fiduciary.

In the case of a fully taxable bond, the amortizable premium is both an adjustment to the basis of the bond and an allowable deduction. In the case of a partially tax-exempt bond, the amortizable premium for the taxable year is: (1) an adjustment to the basis of the bond; (2) a deduction; and (3) a reduction of the total interest upon which the credit against tax allowed by section 35 is computed.

Amortization of bond premium is mandatory with respect to fully tax-exempt bonds. In the case of a fully tax-exempt bond, the amortizable bond premium for the taxable year is an adjustment to the basis of the bond but not an allowable deduction.

**Losses.**—Line 15 should include losses of property not connected with the trade or business of the estate or trust sustained during the year, if arising from fire, storm, shipwreck, or other casualty, or from theft, and if not compensated for by insurance or otherwise. Explain and itemize such losses in Schedule N, setting forth a description of the property, date acquired, cost, subsequent improvements, depreciation allowable since acquisition, insurance, salvage value, and deductible loss. The allowable deduction is (i) the excess of the fair market value of the property immediately before the loss over the fair market value of the property immediately after the loss, or (ii) the adjusted basis of the property, whichever is lesser, reduced by any insurance or compensation received for such loss.

**Net operating loss deduction.**—There shall also be included in line 15 the net operating loss allowed by section 172. Every taxpayer claiming a net operating loss deduction under section 172 shall file with the return a detailed statement setting forth the amount of the net operating loss deduction claimed and all pertinent facts relative thereto, including a detailed schedule showing the computation of the net operating loss deduction.

**Amortization of emergency facilities.**—If the taxpayer elects the deduction with respect to the accelerated amortization of the adjusted basis of (a) any emergency facility with respect to which the Government has issued a certificate of necessity, or (b) a grain storage facility, such deduction should be included in line 15, page 1, and a statement of the pertinent facts should be filed with the election. See sections 168 and 169.

**Unallowable deductions.**—No deductions shall be allowed (a) for expenses which are allocable to one or more classes of income, etc., under section 212 (other than interest income), wholly exempt from tax or (b) for any amount relating to expenses for production of income which is allocable to interest income wholly exempt from tax. For the treatment of interest expense attributable to tax-exempt income, see specific instruction 11. For the determination of the amount of expense attributable to tax-exempt income, see line 2 (a), Schedule G, and specific instruction 35.

As to disallowance of unpaid expenses due related persons, see section 267.

**18. Dividend exclusion.**—If the taxable year of the estate or trust ends after July 31, 1954, there may be entered as an exclusion the first \$50 of dividends received from domestic corporations during the taxable year. See section 116.

This exclusion does not apply to dividends received from:

(a) Life insurance companies, and mutual insurance companies (other than mutual marine companies, or mutual fire insurance companies issuing perpetual policies);

(b) China Trade Act corporations;

(c) So-called exempt organizations (charitable, fraternal, etc.) and farmers' cooperative organizations;

(d) Mutual savings banks, cooperative banks, domestic building and loan associations, domestic savings and loan associations, and Federal savings and loan associations, on deposits or withdrawable accounts.

(e) Regulated investment companies, except to the extent that such dividends are designated by the company as dividends for these purposes; or

(f) Corporations to which section 931 (relating to income from sources within possessions of the United States) applies.

**19. Deductions for distributions to beneficiaries.**—See specific instruction 37.

**21. Deduction for personal exemption.**—An estate is allowed a deduction of \$600. A trust which, under its governing instrument, is required to distribute all of its income currently, is allowed a deduction of \$300; all other trusts are allowed a deduction of \$100.

**24. Tax rate schedule.**—The amount of the tax shall be determined in accordance with the following schedule:

If line 23, page 1, is: Enter as line 24, page 1:

Not over \$2,000 20% of the amount in line 23

Over—	But not over—
\$2,000	\$4,000—\$400, plus 22% of excess over \$2,000
\$4,000	\$6,000—\$840, plus 26% of excess over \$4,000
\$6,000	\$8,000—\$1,360, plus 30% of excess over \$6,000
\$8,000	\$10,000—\$1,960, plus 34% of excess over \$8,000
\$10,000	\$12,000—\$2,640, plus 38% of excess over \$10,000
\$12,000	\$14,000—\$3,400, plus 43% of excess over \$12,000
\$14,000	\$16,000—\$4,260, plus 47% of excess over \$14,000
\$16,000	\$18,000—\$5,200, plus 50% of excess over \$16,000
\$18,000	\$20,000—\$6,200, plus 53% of excess over \$18,000
\$20,000	\$22,000—\$7,260, plus 56% of excess over \$20,000
\$22,000	\$26,000—\$8,380, plus 59% of excess over \$22,000
\$26,000	\$32,000—\$10,740, plus 62% of excess over \$26,000
\$32,000	\$38,000—\$14,460, plus 65% of excess over \$32,000
\$38,000	\$44,000—\$18,360, plus 69% of excess over \$38,000
\$44,000	\$50,000—\$22,500, plus 72% of excess over \$44,000
\$50,000	\$60,000—\$28,820, plus 75% of excess over \$50,000
\$60,000	\$70,000—\$34,320, plus 78% of excess over \$60,000
\$70,000	\$80,000—\$42,120, plus 81% of excess over \$70,000
\$80,000	\$90,000—\$50,220, plus 84% of excess over \$80,000
\$90,000	\$100,000—\$58,620, plus 87% of excess over \$90,000
\$100,000	\$150,000—\$67,320, plus 89% of excess over \$100,000
\$150,000	\$200,000—\$111,820, plus 90% of excess over \$150,000
\$200,000	\$156,820, plus 91% of excess over \$200,000

**26. Income and profits taxes paid to a foreign country or United States possession.**—If, in accordance with section 901, a credit is claimed for income, war profits, or excess profits taxes paid to a foreign country or to a possession of the United States, submit Form 1116 with the return, together with the receipts

for such payments. If credit is sought for accrued taxes, the form must have attached to it a certified copy of the return on which the tax was based. The Commissioner may require a bond on Form 1117 for the payment of any tax found due if the tax when paid differs from the credit claimed. The allowable credit is equal to the total credit shown on Form 1116 minus the proportionate share of the credit allocable to the beneficiaries (total, column 12, Schedule H).

**28. Dividends received credit.**—See specific instruction 42.

**29. Fiduciary's credit for partially tax-exempt interest.**—An estate or trust is allowed a credit against tax for partially tax-exempt interest. The following are examples of securities which yield partially tax-exempt interest: (i) Treasury bonds in excess of \$5,000 principal amount issued before March 1, 1941, and (ii) dividends on shares of Federal Savings and Loan Associations if the shares were issued before March 28, 1942.

The credit allowed to the estate or trust is equal to 3 percent of the total of the interest received from securities described above reduced by (i) the total partially tax-exempt interest includible in the gross income of beneficiaries (total of column 7, Schedule H), and (ii) the amortized bond premium with respect to the bonds producing the interest described above which is claimed as a deduction (see specific instruction 15). However, the credit allowed to the fiduciary may not exceed whichever of the following is the smallest: (i) the amount of the tax on line 24 or line 25, reduced by the sum of the credits allowed for foreign taxes (line 26) and for dividends received (line 28); or (ii) 3 percent of the taxable income for the taxable year (line 23); or (iii) if the alternative tax is applicable, 3 percent of line 4, schedule K.

**32. Schedule D—Capital gains and losses.**—Capital gains and losses generally are taken into account in computing taxable income just as if the estate or trust were an individual. As to disallowance of losses between related persons, see section 267. With respect to capital gains and losses, the gross income of the estate or trust is computed without regard to the distinction between gains and losses allocable to income account and those allocable to corpus account.

The separate Schedule D should first be completed if the estate or trust had any capital gains or losses during the year whether such gains or losses are allocable to the fiduciary or the beneficiary. The following references and instructions refer to Schedule D of Form 1041.

**Allocation of capital gains and losses.**—On line 1, enter in column 1 the amount of short-term gain or loss allocable to the beneficiary or beneficiaries. This includes (a) any amount which is a short-term capital gain under the Internal Revenue Code but which is an item of trust income under the terms of the governing instrument and local law; and (b) any amount which is a short-term capital gain under the Internal Revenue Code and which is allocable to corpus under the terms of the governing instrument and local law, but which is, nevertheless, paid, credited, or required to be distributed to any beneficiary.

Include in line 1, column 1, only those short-term capital losses which are taken into account in determining the amount of gain from the sale or exchange of capital assets which is paid, credited, or required to be distributed to any beneficiary during the taxable year. Enter in line 1, column 2, the amount of the short-term gain or loss allocable to the fiduciary. Enter in line 1, column 3, the sum of line 1 of columns 1 and 2. The amount in line 1, column 3, should be the same as the amount shown on line 6, separate Schedule D.

The long-term gain or loss is treated in line 2 just as short-term gain or loss is treated in line 1. The gains and losses allocable to the beneficiary are entered in column 1, and those not allocable to the beneficiary are entered in column 2. The total long-term gains or losses are entered in column 3. The total shown in column 3 should be the same as the amount shown in line 9, separate Schedule D.

**Basis.**—Generally the basis of property acquired by inheritance is the fair market value of the property at the time of acquisition which usually is the date of death. However, for special rules with respect to the basis of property acquired from a decedent, see section 1014 (b) (9). For basis in case of property acquired by gift and transfers in trust, see section 1015 and instructions under separate Schedule D.

**Redemption of stock to pay death taxes.**—Section 303 deals with redemption of stock included in an estate. List and identify such stock in the appropriate section on separate schedule D, and state the name of the decedent and the District Director's office in which the estate tax return was filed.

**33. Schedule E—Computation of charitable deduction.**—An estate or trust shall be allowed a deduction for any amount of gross income which pursuant to the terms of the governing instrument is, during the taxable year, paid or permanently set aside for a purpose specified in section 170 (c), or is to be used exclusively for religious, charitable, scientific, literary, or educational purposes, or for the prevention of cruelty to children

or animals, or for the establishment, acquisition, maintenance or operation of a public cemetery not operated for profit. This deduction is not subject to the percentage limitation imposed by section 170 on the charitable deduction of an individual, but is subject to the limitations described below. For further special limitations in the case of improper accumulations, prohibited transactions, and so forth, see section 681 (b) and (c). A trust claiming a charitable, etc., deduction under section 642 (c) for the taxable year shall file the information return required under section 6034. Obtain copy of Form 1041A from the District Director of Internal Revenue.

**Current income.**—Enter in line 1 the full amount paid or permanently set aside for the purposes described above out of the current year's income.

Line 2 provides for an adjustment of the charitable contribution attributable to income of the current year (line 1), so that the charitable deductions will not include contributions attributable to tax-exempt interest or foreign income of a foreign trust. In the absence of specific provisions in the governing instrument, enter in line 2 the amount shown in line 1 multiplied by the total of all tax-exempt interest and foreign income of a foreign trust included in income of the current year (under the governing instrument and local law) and divided by the total of all the gross income items included in income of the current year (under the governing instrument and local law). In computing the total of all items of gross income under applicable local law, do not reduce gross income by any losses (such as losses from the sale or exchange of property).

Lines 3 and 4 provide for adjustment of a charitable contribution which is deemed to include long-term capital gains in order to prevent a double deduction on account of such gains. Line 3 (a) is the total amount of long-term gain contained in line 1. This is computed by multiplying the amount shown in line 1 by the total of long-term capital gains allocated to income (under the governing instrument and local law) and dividing the result by the total of all the gross income items included in income of the current year (under the governing instrument and local law). For purposes of this adjustment, long-term capital gain of the current year allocable to corpus and paid or permanently set aside for a charitable purpose is not included in the distribution made to charity out of the current year's income. Such amounts shall be taken into account in line 7, after a similar adjustment is made.

**Contributions not attributable to current income.**—Enter in line 7 the total of deductible amounts paid or permanently set aside for the purpose specified in section 170 (c) (relating to definition of charitable contribution) or to be used for the charitable, etc., purposes specified in section 642 (c) to the extent that such amounts are not attributable to income (under the governing instrument and local law) of the current year. Attach a statement showing the details.

**34. Schedule F—Computation of capital gains in distributable net income.**—The capital gains to be included in distributable net income are, in general, those distributed to beneficiaries or to charity. (See specific instruction 35 for further details concerning distributable net income and specific instruction 33 for charitable contributions.) The capital gains to be included in distributable net income on account of allocations to beneficiaries has already been determined in line 3, column 1, of Schedule D. (If line 3, column 1 of Schedule D, shows a net loss, the net loss is not taken into account in computing distributable net income and line 1 should be completed by entering zero.)

The long-term capital gains contained in charitable contributions have already been computed according to the directions in specific instruction 33 for lines 3 (a) and 7, Schedule E. Distributable net income also includes short-term capital gains to the extent that such gains are included in charitable contributions. The amount of short-term capital gains to be so included is computed in the same manner as the amount of long-term capital gains, that is, according to the directions in specific instruction 33 for lines 3 (a) and 7, Schedule E, except that the appropriate amounts of short-term capital gain are to be substituted for the amounts of long-term capital gain.

**35. Schedule G—Computation of distributable net income.**—Distributable net income is an amount which limits the amount deductible by the estate or trust on account of distributions and (except in the case of a current income beneficiary of an estate or trust which claims a charitable deduction) the amount taxable to the beneficiary. It is also used to determine the character of the distributions to the beneficiaries.

**Distributable net income—General.**—Distributable net income is the taxable income of the estate or trust (generally computed in the same manner as in the case of an individual) with the modifications set forth in section 643 (a).

The items of gross income in distributable net income are the items of gross income shown in lines 1 through 9, page 1, with the modifications described below.

## PAGE 6

(a) *Dividends.*—The dividends in distributable net income are those shown in line 1, page 1, without reduction by the amount shown in line 18, page 1. However, dividends in distributable net income must be reduced by the amount shown in line 4 (b) of this schedule.

(b) *Capital gains.*—The capital gains or losses shown in line 8 (b), page 1, are not included in distributable net income. There can in no event be a net capital loss in distributable net income, and the gross amount of net capital gain to be included in distributable net income is the amount shown in line 4, Schedule F.

(c) *Tax-exempt interest.*—In addition to the items of income included in lines 1 through 9, page 1, distributable net income includes interest and foreign income of a foreign trust after adjustment according to the specific instructions for lines 2 (a) and 2 (b) below.

The items of deduction entering into distributable net income are those allowed to the estate or trust in computing its taxable income except the capital gains deduction under section 1202 (line 20, page 1), the special deductions for distributions under sections 651 and 661 (line 19, page 1), and the deduction in lieu of the deduction for personal exemptions under section 642 (b), line 21, page 1. There are special rules provided in section 643 (a) (3) with respect to the allowance of deductions on account of capital losses. See the detailed directions below for completing lines 2 (c), 2 (d), and 4 (a) of this schedule and specific instruction 34. In addition, certain disbursements, expenses, losses, etc., of the estate or trust which, under the provisions of section 265, are not allowable as deductions are treated as deductions in determining distributable net income in the manner described in the preceding paragraph.

*Detailed directions for completing the lines in Schedule G.*—

*Line 1:* Enter the amount shown in line 17, page 1. This is the taxable income of the estate or trust without taking into account the deduction for long-term capital gains, the deduction for distributions to beneficiaries, and the deduction in lieu of the personal exemption and the dividend exclusion.

*Line 2 (a):* Enter the amount of tax-exempt interest received, less: (i) the amount of tax-exempt interest shown in line 2 of Schedule E; and (ii) any amounts which, but for the provisions of section 265, would be deductible in respect of disbursements, expenses, losses, etc., of the trust or estate directly attributable or indirectly allocable to such interest. The amount of the disbursements, etc., indirectly allocable to tax-exempt interest is that amount which bears the same ratio to the total disbursements, etc., of the trust or estate not directly attributable to other items of income as the total tax-exempt interest received bears to the total of all the items of gross income (including tax-exempt interest and foreign income of a foreign trust) entering into distributable net income.

*Line 2 (b):* Enter the amount of foreign income of a foreign trust adjusted in the same manner as tax-exempt interest.

Lines 2 (c), 2 (d), and 4 (a) show the adjustments to be made in computing distributable net income on account of capital gains and losses. If line 8 (b), page 1, shows a net capital gain in taxable income, the amount is to be entered in line 4 (a) of this schedule, but if line 8 (b), page 1, shows a net capital loss, the amount is to be entered in line 2 (d) of this schedule. This has the effect of removing all of the fiduciary's share of capital items from distributable net income, but to complete the adjustment there must be entered in line 2 (c) the amount shown in line 4, Schedule F.

*Line 4 (b):* Enter those items of gross income constituting extraordinary dividends or taxable stock dividends which the trustee of a "simple" trust acting in good faith, does not pay or credit to any beneficiary by reason of his determination that such dividends are allocable to corpus under the terms of the governing instrument and local law. This rule does not apply to an estate or to a "complex" trust, and, in the case of an estate or a "complex" trust, no amount is to be entered in line 4 (b). For the definition of "simple" and "complex" trusts, see general instruction R.

**36. Schedule H—Beneficiaries' shares of income and credits.**—Schedule H indicates distributions to the beneficiaries and also indicates their allocable share of credits for tax paid at the source on tax-free covenant bond interest and for taxes paid to a foreign country or U. S. possession. Enter in columns 1 and 2 the name and address of each beneficiary to whom any amount is paid, credited, or required to be distributed in the taxable year of the estate or trust.

## Distributions (Columns 3 and 4)

*Amounts to be included.*—In column 3 enter the amounts of income of the estate or trust required to be distributed currently to each beneficiary, whether distributed or not. For the purpose of determining what amounts are to be included in column 3, the question of what are items of income and the question of whether

an amount is required to be distributed currently are to be determined under the governing instrument and applicable local law. If the governing instrument requires that stated amounts must be paid to a beneficiary and further provides that such amounts may be paid either out of income or out of corpus, such amounts are to be included in column 3 to the extent they are actually paid out of income of the current year.

Enter in column 4 any other amounts actually paid, credited, or required to be distributed to each beneficiary in the taxable year, whether such amounts are from income (current or accumulated) or from corpus.

*Amounts not included.*—Do not include, either in column 3 or column 4, any amount which, under the terms of the governing instrument, is properly paid or credited as a gift or bequest of a specific sum of money or of specific property. To qualify as a gift or bequest excluded from columns 3 and 4, a sum must be paid all at once or in not more than three installments. Furthermore, an amount which can be paid or credited only from the income of the estate or trust is not considered a gift or bequest of a specific sum of money. See section 663 (a) (1). Do not include in column 3 or column 4 any amount paid or permanently set aside for the purposes described in section 642 (c) or otherwise qualifying for the charitable deduction. See section 663 (a) (2).

If a trust or estate (during the first 65 days of the first taxable year of the trust or estate to which the Internal Revenue Code of 1954 applies) paid, credited, or was required to distribute amounts which (under the Internal Revenue Code of 1939) would be treated as if paid, credited, or to be distributed on the last day of the preceding taxable year, such amounts are to be omitted from both columns 3 and 4. Such amounts are to be treated as if paid, credited, or to be distributed in the preceding taxable year. See section 683 (b).

*Elective 65-day rule.*—The fiduciaries of certain trusts may elect to continue to treat distributions within the first 65 days of the taxable year of the trust as amounts which were paid or credited on the last day of the preceding taxable year. The election is only available if the trust was created prior to January 1, 1954, and if the terms of the trust instrument provide that the trust may not distribute, in any taxable year, amounts in excess of the trust income for the immediately preceding taxable year. The election must be made not later than the time prescribed by law (including extensions thereof) for filing the return for the first taxable year to which Part I of Subchapter J of the Internal Revenue Code of 1954 applies. It shall apply with respect to all subsequent taxable years.

## Character of Distributions (Columns 5 through 10)

*In general.*—The entries in columns 5 through 9 will show both the amount and the character of the income of the estate or trust which the beneficiaries must include in their gross income. Those inclusions in the gross income of beneficiaries which are on account of amounts of ordinary income not subject to special treatment are to be reflected in column 5. Those which are on account of domestic dividends qualifying for credit are to be reflected in column 6, but must be divided between inclusions on account of such dividends received before August 1, 1954, and those received after July 31, 1954, by the fiduciary. Those on account of partially tax-exempt interest are to be reflected in column 7. Inclusions in the gross income of beneficiaries on account of amounts of capital gains are to be reflected in columns 8 and 9. The result of the computations in Schedule F is to apply capital losses (to the extent allowable in computing distributable net income) against capital gains. Thus, the inclusions in gross income in columns 8 and 9 (computed according to the instructions below) take such losses into account. Column 10 reflects that portion of the distributions to beneficiaries which is deemed made from tax-exempt interest and foreign income of a foreign trust.

Because the beneficiary of an estate or trust cannot, except in the cases described in General Instruction P and specific instruction 40, claim losses or deductions of the estate or trust, no negative amounts may appear in columns 5 through 10.

In the ordinary case, the beneficiaries must include in gross income the total distributions (the totals of columns 3 and 4) or the distributable net income of the estate or trust, whichever is less. See, however, the directions below with respect to current income beneficiaries of an estate or trust claiming a charitable deduction.

*Determining the share of each beneficiary.*—The computations below will produce the amounts to be shown as the totals of each of the columns 5 through 10, Schedule H. Each such total except that in column 10 must be apportioned among the several beneficiaries of the estate or trust.

(i) That part of the total in each column which represents amounts shown in column 3 (income required to be distributed currently) must be apportioned among the same beneficiaries

to whom are assigned the amounts in column 3. Such portion of the total of each column must be apportioned to each such beneficiary in the same proportion as the amount assigned to him in column 3 is of the total of column 3.

(ii) That part of the total in each column which represents amounts shown in column 4 (other amounts paid, credited, or required to be distributed) must be apportioned among the same beneficiaries to whom are assigned the amounts in column 4. Such part of the total must be apportioned to each such beneficiary in the same proportion as the amount assigned to him in column 4 is of the total of column 4.

However, if the terms of the governing instrument provide that the various classes of income in columns 5 through 10 are to be distributed among beneficiaries in a manner other than that described above, the total in each of columns 5 through 10 is to be distributed (in that column) among the beneficiaries according to the terms of the governing instrument.

For purposes of the computation above, the totals shown in columns 5 through 10 are deemed first to be proportionate distributions on account of the total amount in column 3. If the totals in columns 5 through 10 are in excess of the total in column 3, then such excess is deemed to be proportionately on account of the total amount in column 4.

If column 10 includes foreign income of a foreign trust, attach to the return a separate statement showing the amount of such income allocable to each beneficiary.

**Determining totals of columns 5 through 10.**—Under the law, the method for determining the totals of columns 5 through 10 in the case of certain estates or trusts claiming a charitable deduction (line 14, page 1) is different from the method applicable to all other estates and trusts. Accordingly, the two methods are stated separately below.

**Estates and trusts not claiming charitable deductions.**—If the estate or trust does not claim a charitable deduction for the taxable year, the totals to be shown in columns 5 through 10 shall be determined according to the following directions.

• **Step one—Determining the aggregate amount.**—The aggregate amount which is to be allocated to columns 5 through 10 is the lesser of:

(i) the distributable net income of the trust (line 5, Schedule G), or

(ii) the sum of the totals of columns 3 and 4 of this schedule.

• **Step two—Determining gross amounts.**—This step accomplishes two things. It determines the items of gross income entering into the computation of distributable net income and groups such items according to the headings of columns 5 through 10. Segregate the gross income of the estate or trust (lines 1 through 9, page 1) according to the headings of columns 5 through 7. However, for this purpose:

(i) disregard the amount shown on line 8 (b), relating to capital gains and losses;

(ii) disregard any negative amount (loss) shown on lines 1 through 8 (a), and line 9, of page 1 (such amounts shall be treated under step three as deductions);

(iii) treat the income shown on line 18, page 1 (excluded dividends) as gross dividend income; and

(iv) exclude from gross income the amount shown on line 4 (b) of Schedule G (certain extraordinary and taxable stock dividends).

The gross amount for column 8 is the amount of the beneficiaries' share of short-term capital gain as shown in line 1, column 1, Schedule D (reduced, but not below zero, by any loss shown in line 2, column 1, Schedule D) plus the amount of short-term capital gain included in amounts paid or permanently set aside for charity (line 3, Schedule F).

The gross amount for column 9 is the beneficiaries' share of long-term capital gain as shown in line 2, column 1, Schedule D (reduced, but not below zero, by any loss shown on line 1, column 1, Schedule D) plus the amount of long-term capital gain included in amounts paid or permanently set aside for charity (line 2, Schedule F).

The gross amount of column 10 of this schedule is the total of the amounts shown in lines 2 (a) and 2 (b) of Schedule G (tax-exempt interest, as adjusted, and foreign income of a foreign trust, as adjusted). This is an adjusted amount (see specific instruction 35), and is not to be adjusted for deductions under step three.

• **Step three—Adjusting gross amounts by deductions.**—The gross amounts for each of columns 5 through 9 as determined under step two shall be reduced by allocating to such amounts the deductions shown on page 1 (line 16, page 1, and any negative amounts shown on lines 1 through 8 (a), and line 9, page 1).

(i) There shall first be allocated to each such gross amount those items of deduction shown on page 1 which are directly attributable to the items of gross income in the gross amount;

(ii) The deductions which have not been allocated under (i) above shall be allocated to the gross amounts for columns 5

through 9. These deductions may first be allocated to the gross amount for any column. However, the amount assigned to any one column shall in no event exceed the gross amount for such column determined under step two above reduced by the deductions allocated to such gross amount according to (i) above.

(iii) Each of the gross amounts for columns 5 through 9 shall then be reduced by the deductions allocated to it according to (i) and (ii) above.

If the computation in (iii) above produces a negative amount for any column, such negative amount shall be allocated to the gross amount for each of the other columns (5 through 10) according to the rule stated in (ii) above.

The sum of all the adjusted gross amounts for columns 5 through 10, determined according to this step, will equal the amount of the distributable net income (line 5, Schedule G).

• **Step four—Amount to be entered as total of each column.**—If the aggregate amount, determined under step one, is the distributable net income (line 5, Schedule G), enter as the total of each of columns 5 through 10 the adjusted gross amount (as determined in steps two and three) for such column. If the aggregate amount, determined under step one, is the sum of the distributions, enter as the total of each column an amount which is the same proportion of the sum of the distributions as the adjusted gross amount for such column (as determined by steps two and three) is of the sum of all such adjusted gross amounts for columns 5 through 10.

**Estates and trusts claiming charitable deductions.**—If an estate or trust claims a charitable deduction, the determination of the totals of columns 5 through 10 requires the same type of computation as if no charitable deduction were claimed. However, after the allocation of specific deductions (part (i) of step 3) and before the allocation of other deductions (part (ii) of step 3) the charitable deduction must be allocated among the gross amounts for columns 5 through 9. In the absence of specific provisions in the governing instrument, the part of the charitable deduction to be allocated to the gross amount for each of the columns 5 through 9 is the amount which bears the same proportion to the total charitable deduction as the gross amount for such column bears to the total of all the gross amounts for columns 5 through 9. If the amount so allocated to the gross amount for any one column exceeds the gross amount for such column reduced by the deductions allocated to it under part (i) of step 3, the excess must be allocated proportionately to the gross amounts for each of the remaining columns in the same manner. Further, in completing part (ii) of step 3, the amount of deductions assigned to the gross amount for any one column shall in no event exceed the gross amount for such column reduced by the sum of the deductions allocated to such gross amounts according to part (i) of step 3 and that part of the charitable deduction allocated to such gross amount according to the directions immediately above.

The estate or trust shall determine the totals of columns 5 through 10 according to the directions above for an estate or trust not claiming such deduction, if, and only if, both of the following conditions are present:

(i) the distributable net income (line 5, Schedule G) is equal to or exceeds the total of the amount of income required to be distributed currently (the total of column 3); and

(ii) the charitable deduction claimed includes no amounts paid or permanently set aside from sources other than income of the current year (that is, if the amount in line 7, Schedule E, is zero).

(a) **Estates and trusts with charitable deductions attributable to current year's income.**—If the charitable deduction claimed includes no amounts paid or permanently set aside from sources other than income of the current year, but the distributable net income is less than the amount of income required to be distributed currently (total of column 3), then the estate or trust shall determine the totals of columns 5 through 10 according to the steps described immediately below.

• **Step one—Determining the aggregate amount.**—The aggregate amount which is to be allocated to columns 5 through 10 is whichever is the lesser of the following:

(i) The distributable net income (line 5, Schedule G) plus the charitable deduction (line 14, page 1), plus the amounts shown in line 2 of Schedule E, or

(ii) The total of column 3 of this schedule.

• **Step two—Determining gross amounts.**—The determination of the gross amount for each of columns 5 through 10 shall be made in the same manner as set forth in step two of the instructions for an estate or trust which has no charitable deduction.

• **Step three—Adjusting gross amounts by deductions.**—The adjustment of gross amounts by deductions shall be made in the same manner as set forth in step three of the instructions for estates and trusts having no charitable deduction. However,

## PAGE 8

it should be noted that (in the absence of specific provisions in the governing instrument) the charitable deduction (line 14, page 1) is to be allocated among the gross amounts for columns 5 through 9 according to the directions in the paragraph above immediately following the caption "Estates & trusts claiming charitable deductions."

The sum of all the adjusted gross amounts for columns 5 through 10, determined according to this step, will equal the amount of the distributable net income (line 5, Schedule G).

• **Step four—Amount to be entered as total of each column.**—Enter as the total of each of columns 5 through 10 an amount which is the same proportion of the aggregate amount determined under step one as the adjusted gross amount for such column (as determined by steps two and three) is of the sum of all such adjusted gross amounts for columns 5 through 10.

(b) *Estates and trusts with charitable deductions attributable to other than current year's income.*—In the case of estates and trusts which claim a charitable deduction under section 642 (c) (see specific instruction 33) any portion of which is not attributable to income of the current year (line 7, Schedule E), see section 662 (b).

## Credits (Columns 11 and 12)

Enter in columns 11 and 12, respectively, the amounts of Federal income tax paid at source and of income and profits taxes paid to a foreign country or United States possession which are allocable to each beneficiary. The amount allocable to each beneficiary is that part of the total of each item which is proportional to the amount of the corresponding income item included in the gross income of the beneficiary.

37. **Schedule J—Computation of distributions deduction.**—This schedule provides for the computation of the deduction allowable to the fiduciary for amounts paid, credited, or required to be distributed to the beneficiaries of the estate or trust. The deduction is equal to the amounts paid, credited, or required to be distributed or the distributable net income—whichever is less, adjusted in either case so as to exclude items of tax-exempt income entering into distributable net income.

38. **Schedule K—Fiduciary's capital gains deduction.**—Section 1202 provides a special rule for the deduction for long-term capital gains of an estate or trust. The deduction is computed by excluding that portion of the gains from sales or exchanges of capital assets which is includible in the income of the beneficiaries. Lines 1 (a) through 1 (e) provide for the computation of long-term capital gains allocable to the fiduciary for the purpose of computing this deduction.

39. **Schedule L—Income (or loss) from partnerships, income from other fiduciaries.**—Enter the total amounts of income or loss from partnerships in which the estate or trust is a partner and income paid, credited, or required to be distributed to the estate or trust by other fiduciaries. The items entering into the income are to be carried to the appropriate lines on page 1, according to specific instruction 5.

40. **Schedule M—Deduction for depreciation.**—This schedule relates to the deduction for depreciation under section 167. If a deduction for depletion is claimed (see sections 611 through 614), attach a statement showing details.

*Computing the depreciation deduction—Straight-line method.*—The most common method of computing depreciation is the "straight-line method." It allows for the deduction of cost in equal annual amounts over the useful life of the property, with only salvage value remaining at the end of its useful life. To compute the deduction, add the cost of improvements to the cost (or other basis) of the asset and deduct both the estimated salvage value and the total depreciation allowed or allowable in

past years. Divide the result by the number of years of useful life remaining to the asset—this result is the depreciation deduction.

*Special rules for new assets acquired after December 31, 1953.*—New assets acquired by the taxpayer after 1953 and the portion of the basis of property attributable to construction or reconstruction by the taxpayer after 1953 may be depreciated under methods proper in the past or under additional methods provided in the new law. These new methods (which may be employed only with respect to tangible assets having a useful life of 3 years or more) are

(a) *"Declining balance method."*—The deduction is computed by applying a uniform rate to the cost or other basis of the asset reduced by depreciation previously allowed or allowable. This rate cannot exceed twice the straight line rate computed without regard to salvage value.

(b) *"Sum of the years-digits method."*—The deduction is the cost or other basis of the asset (reduced by estimated salvage value) multiplied by the number of years of useful life remaining to it (including the year of the deduction) divided by the sum of all the digits corresponding to the years of the asset's estimated useful life (in the case of a 3-year life such sum would be 6, that is 1+2+3).

(c) *"Other methods."*—Other methods may be employed subject to special limitations; for details consult the District Director of Internal Revenue.

*Beneficiaries' and fiduciary's share of depreciation and depletion deductions.*—An estate or trust is allowed the deductions for depreciation and depletion only to the extent that these deductions are not allocable to beneficiaries. Under sections 167 (g) and 611 (b) (3), the allowable deductions for depreciation and depletion are apportioned between the income beneficiaries of a trust and the trustee in accordance with the provisions of the governing instrument or, in the absence of such provisions, on the basis of the income (determined under the governing instrument and applicable local law) allocable to each. Under sections 167 (g) and 611 (b) (4), the allowable deductions for depreciation and depletion are apportioned between an estate and its heirs, legatees, or devisees on the basis of the income (determined under the governing instrument and applicable local law) of the estate allocable to each. Enter the fiduciary's share of each depreciation allowance claimed in column 7B Schedule M. Enter the total of the fiduciary's share in line 3, Schedule M, and include this amount in line 13, page 1.

41. **Schedule N—Explanation of deductions.**—Itemize the deductions for interest (line 11, page 1), taxes (line 12, page 1), and other deductions (line 15, page 1) in Schedule N. The number of the line on page 1 in which the deduction is included, a brief explanation of the deduction, and the amount thereof should be indicated. If the space provided on the form is insufficient, attach a separate schedule.

42. **Schedule O—Fiduciary's share of dividend received credit.**—For taxable years ending after July 31, 1954, an estate or trust is allowed a credit against tax for dividends received from domestic corporations (except those listed in (a) through (f) of specific instruction 18) which are included in gross income, but only in respect of so much of such dividends as is not included in the gross income of any beneficiary under section 652 or 662. (See line 5.)

Lines 2 through 4 reflect the adjustment of the dividends received after July 31, 1954, for that part of such dividends which have been excluded under section 116. (See specific instruction 18.)

**SCHEDULE D**For use with

NOTE.—In lines 18 to 25 the treatment in the case of a joint return is also applicable to a return of a surviving widow or widower.

**INSTRUCTIONS—(References are to the Internal Revenue Code of 1954)****GAINS AND LOSSES FROM SALES OR EXCHANGES OF PROPERTY.**—Report details in schedule on other side.

**"Capital assets" defined.**—The term "capital assets" means property held by the taxpayer (whether or not connected with his trade or business) but does NOT include—

- (a) stock in trade or other property of a kind properly includible in his inventory if on hand at the close of the taxable year;
- (b) property held by the taxpayer primarily for sale to customers in the ordinary course of his trade or business;
- (c) property used in the trade or business of a character which is subject to the allowance for depreciation provided in section 167;
- (d) real property used in the trade or business of the taxpayer;
- (e) certain government obligations issued on or after March 1, 1941, at a discount, payable without interest and maturing at a fixed date not exceeding one year from date of issue;
- (f) certain copyrights, literary, musical, or artistic compositions, etc.; or
- (g) accounts and notes receivable acquired in the ordinary course of trade or business for services rendered or from the sale of property referred to in (a) or (b) above.

In connection with (b) above, the law allows dealers in securities capital gain or loss treatment with respect to certain securities which were clearly identified as being held for investment. Also, in the case of a taxpayer other than a corporation, certain real property subdivided for sale may be treated as capital assets. Sections 1236 and 1237.

If the total distribution to which an employee is entitled under an employees' pension, bonus, or profit-sharing trust plan exempt from tax under section 501(a), is received by the employee in one taxable year, on account of the employee's separation from the service, the aggregate amount of such distribution, to the extent it exceeds the amounts contributed by the employee, shall be treated as a long-term capital gain. See section 402.

A capital gain dividend, as defined in section 852 (relating to tax on regulated investment companies), shall be treated by the shareholder as a long-term capital gain.

Gain on sale of depreciable property between husband and wife or between a shareholder and a "controlled corporation" shall be treated as ordinary gain. Section 1239.

A transfer (other than by gift, inheritance, or devise) by an individual "holder" of all substantial rights evidenced by a patent, or an undivided interest therein, shall be considered the sale or exchange of a capital asset held for more than 6 months.

Gains and losses from transactions described in section 1231 (see below) shall be treated as gains and losses from the sale or exchange of capital assets held for more than 6 months if the total of these gains exceeds the total of these losses. If the total of these gains does not exceed the total of these losses, such gains and losses shall not be treated as gains and losses from the sale or exchange of capital assets. Thus, in the event of a net gain, all these transactions should be entered in the "long-term capital gains and losses" portion of Schedule D. In the event of a net loss, all these transactions should be entered in the "property other than capital assets" portion of Schedule D, or in other applicable schedules on Forms 1040, 1041, or 1065.

Section 1231 deals with gains and losses arising from—

- (a) sale, exchange, or involuntary conversion, of land (including in certain cases unharvested crops sold with the land) and depreciable property if they are used in the trade or business and held for more than 6 months;
- (b) sale, exchange, or involuntary conversion of livestock held for draft, breeding, or dairy purposes (but not including poultry) and held for 1 year or more;
- (c) the cutting of timber or the disposal of timber or coal to which section 631 applies; and
- (d) the involuntary conversion of capital assets held more than 6 months.

See sections 1231 and 631 for specific conditions applicable.

**Description of property listed.**—State following facts: (a) For real estate (including owner-occupied residences), location and description of land and improvements; (b) for bonds or other evidences of indebtedness, name of issuing corporation, particular issue, denomination, and amount; and (c) for stocks, name of corporation, class of stock, number of shares, and capital changes affecting basis (including nontaxable distributions).

**Basis.**—In determining gain or loss in case of property acquired after February 28, 1913, use cost, except as specially provided. The basis of property acquired by gift after December 31, 1920, is the cost or other basis to the donor in the event of gain, but, in the event of loss, it is the lower of either such donor's basis or the fair market value on date of gift. Generally the basis of property acquired by inheritance is the fair market value at time of acquisition which usually is the date of death. For special cases involving property acquired from a decedent, see section 1014. In the case of sales and exchanges of automobiles and other property not used in

your trade or business, or not used for the production of income, the basis for determining gain is the original cost plus the cost of permanent improvements thereto. No losses are recognized for income tax purposes on the sale and exchange of such properties. In determining GAIN in case of property acquired before March 1, 1913, use the cost or the fair market value as of March 1, 1913, as adjusted, whichever is greater, but in determining LOSS use cost as adjusted.

**Sale of a personal residence.**—See Form 1040 instructions for special rules applicable to sale or exchange of your residence.

**Losses on securities becoming worthless.**—If (a) shares of stock become worthless during the year or (b) corporate securities with interest coupons or in registered form become worthless during the year, and are capital assets, the loss therefrom shall be considered as from the sale or exchange of capital assets as of the last day of such taxable year.

**Nonbusiness debts.**—If a debt, such as a personal loan, becomes totally worthless within the taxable year, the loss resulting therefrom shall be considered a loss from the sale or exchange, during the taxable year, of a capital asset held for not more than 6 months. Enter such loss in column (h) and describe in column (a) in the schedule of short-term capital gains and losses on other side. This does not apply to (a) a debt evidenced by a corporate security with interest coupons or in registered form and (b) a debt acquired in your trade or business.

**Classification of capital gains and losses.**—The phrase "short-term" applies to gains and losses from the sale or exchange of capital assets held for 6 months or less; the phrase "long-term" applies to capital assets held for more than 6 months.

**Treatment of capital gains and losses.**—Short-term capital gains and losses will be merged to obtain the net short-term capital gain or loss. Long-term capital gains and losses (taken into account at 100 percent) will be merged to obtain the net long-term capital gain or loss. If the net short-term capital gain exceeds the net long-term capital loss, 100 percent of such excess shall be included in income. If the net long-term capital gain exceeds the net short-term capital loss, 50 percent of such excess shall be included in income. In the case of a fiduciary, see section 1202.

**Limitation on allowable capital losses.**—If the sum of all the capital losses exceeds the sum of all the capital gains (all such gains and losses to be taken into account at 100 percent), then such capital losses shall be allowed as a deduction only to the extent of (1) current year capital gains plus (2) the smaller of either the taxable income of the current year (or adjusted gross income if tax table is used) or \$1,000. For this purpose taxable income is computed without regard to capital gains or losses or the deduction for exemptions. The excess of such allowable losses over the sum of items (1) and (2) above is called "capital loss carryover" (not applicable to partnerships). It may be carried forward and treated as a short-term capital loss in succeeding years. However, the capital loss carryover of each year should be kept separate, since the law limits the use of such carryover to the five succeeding years. In offsetting your capital gain and income of 1954 by prior year loss carryovers, use any capital loss carryover from 1949 before using any such carryover from 1950 or subsequent years. Any 1949 carryover which cannot be used in 1954 must be excluded in determining total loss carryover to 1955 and subsequent years.

**Collapsible corporations.**—Gain from the sale or exchange of stock in a collapsible corporation is not a capital gain. Section 341.

**"Wash sales" losses.**—Losses from the sale or other disposition of stocks or securities are not deductible (unless sustained in connection with the taxpayer's trade or business) if, within 30 days before or after the date of sale or other disposition, the taxpayer has acquired (by purchase or by an exchange upon which the entire amount of gain or loss was recognized by law) or has entered into a contract or option to acquire, substantially identical stock or securities.

**Losses in transactions between certain persons.**—No deduction is allowable for losses from sales or exchanges of property directly or indirectly between (a) members of a family, (b) a corporation and an individual (or a fiduciary) owning more than 50 percent of the corporation's stock (liquidations excepted), (c) a grantor and fiduciary of any trust, (d) a fiduciary and a beneficiary of the same trust, (e) a fiduciary and a fiduciary or beneficiary of another trust created by the same grantor, or (f) an individual and a tax-exempt organization controlled by the individual or his family.

**ALTERNATIVE TAX.**—If the net long-term capital gain exceeds the net short-term capital loss, or in the case of only a long-term capital gain, individual taxpayers (a) filing separate returns with taxable income exceeding \$18,000, or (b) filing joint returns or as surviving widows or widowers with taxable income exceeding \$36,000, or (c) filing as head of household with taxable income exceeding \$24,000, will usually find it to their advantage to compute the alternative tax on the other side. The alternative tax, if less than the tax computed on page 3 of Form 1040, shall be the tax liability.
